INTRODUCTION

The goal of this project is to prepare a Safe Routes to School (SR2S) plan by which a comprehensive strategy can be established to address safety for children and their families that use Valparaiso Avenue and the surrounding streets to travel to Menlo School, Sacred Heart Schools, St. Raymond Elementary School, Hillview School, Nativity Elementary School, Encinal School, and Oak Knoll School. The study area for this SR2S plan is located in Menlo Park, California as illustrated in **Figure 1**. The study area is bordered by Valparaiso Avenue to the north, Santa Cruz Avenue and Ravenswood Avenue to the south, Elder Avenue to the west, and Laurel Street to the east. For informational purposes, Menlo Park City School District boundaries are also shown in **Figure 1**.

Valparaiso Avenue is the primary access to Menlo School and Sacred Heart Schools. Valparaiso Avenue is also an important link between El Camino Real and Alameda De Las Pulgas. Valparaiso Avenue is a straight roadway nearly two miles in length, with intersecting side streets controlled by stop signs, numerous private driveways, and mid-block crosswalks as illustrated in **Figure 1**. Bicycle lanes exist on both sides of Valparaiso Avenue within the study area. Along the south side of Valparaiso Avenue, the street has segments with narrow sidewalks interrupted by trees or no sidewalks at all. As a result, students and parents have been observed to walk and bicycle along the unpaved shoulder or in the street.

Santa Cruz Avenue is the primary access to Hillview Middle School and provides access to Saint Raymond Elementary School. Similar to Valparaiso Avenue, Santa Cruz Avenue is also an important link between El Camino Real and Alameda De Las Pulgas. Santa Cruz Avenue is also a roadway nearly two miles in length, with intersecting side streets controlled by stop signs, private driveways, and mid-block crosswalks, as illustrated in **Figure 1**. Bicycle lanes exist on both sides of Santa Cruz Avenue from the beginning of the study area at Elder Avenue to University Drive. Along both sides of Santa Cruz Avenue, the street has segments with narrow sidewalks interrupted by trees or no sidewalks at all. There are also locations with crosswalks with no curb ramps, and locations where there is ponding on crosswalks and sidewalks. As a result, students have been observed to walk and bike along the unpaved shoulder or in the street. School children were also observed to be walking in the bike lanes along with bicyclists.

Elder Avenue is the primary access to Hillview Middle School on the west end of the study area. Elder Avenue provides a link between Valparaiso Avenue and Santa Cruz Avenue. Elder Avenue is a straight roadway only a quarter mile in length with intersecting side streets controlled by stop signs and private driveways. Along the east side of Elder Avenue, the street has a continuous asphalt walking area, but maintenance is needed. Vehicles park on the walking area and there is evidence of degradation to the surface. As a result students have been observed to walk and bicycle along the street to avoid parked vehicles or damaged walking areas.

Due to the nature of the roadways and the traffic generated by the schools and the

neighborhoods, conflicts between the various users of the study areas transportation facilities are common. During peak school hours, Valparaiso Avenue and Santa Cruz Avenue are congested as parents and students arrive or leave the vicinity. This combination of existing design, alignment, neighborhood traffic, and the proximity of the local schools, has resulted in a conflicting mix of school, neighborhood, pedestrian, bicycle, and cut-through traffic.

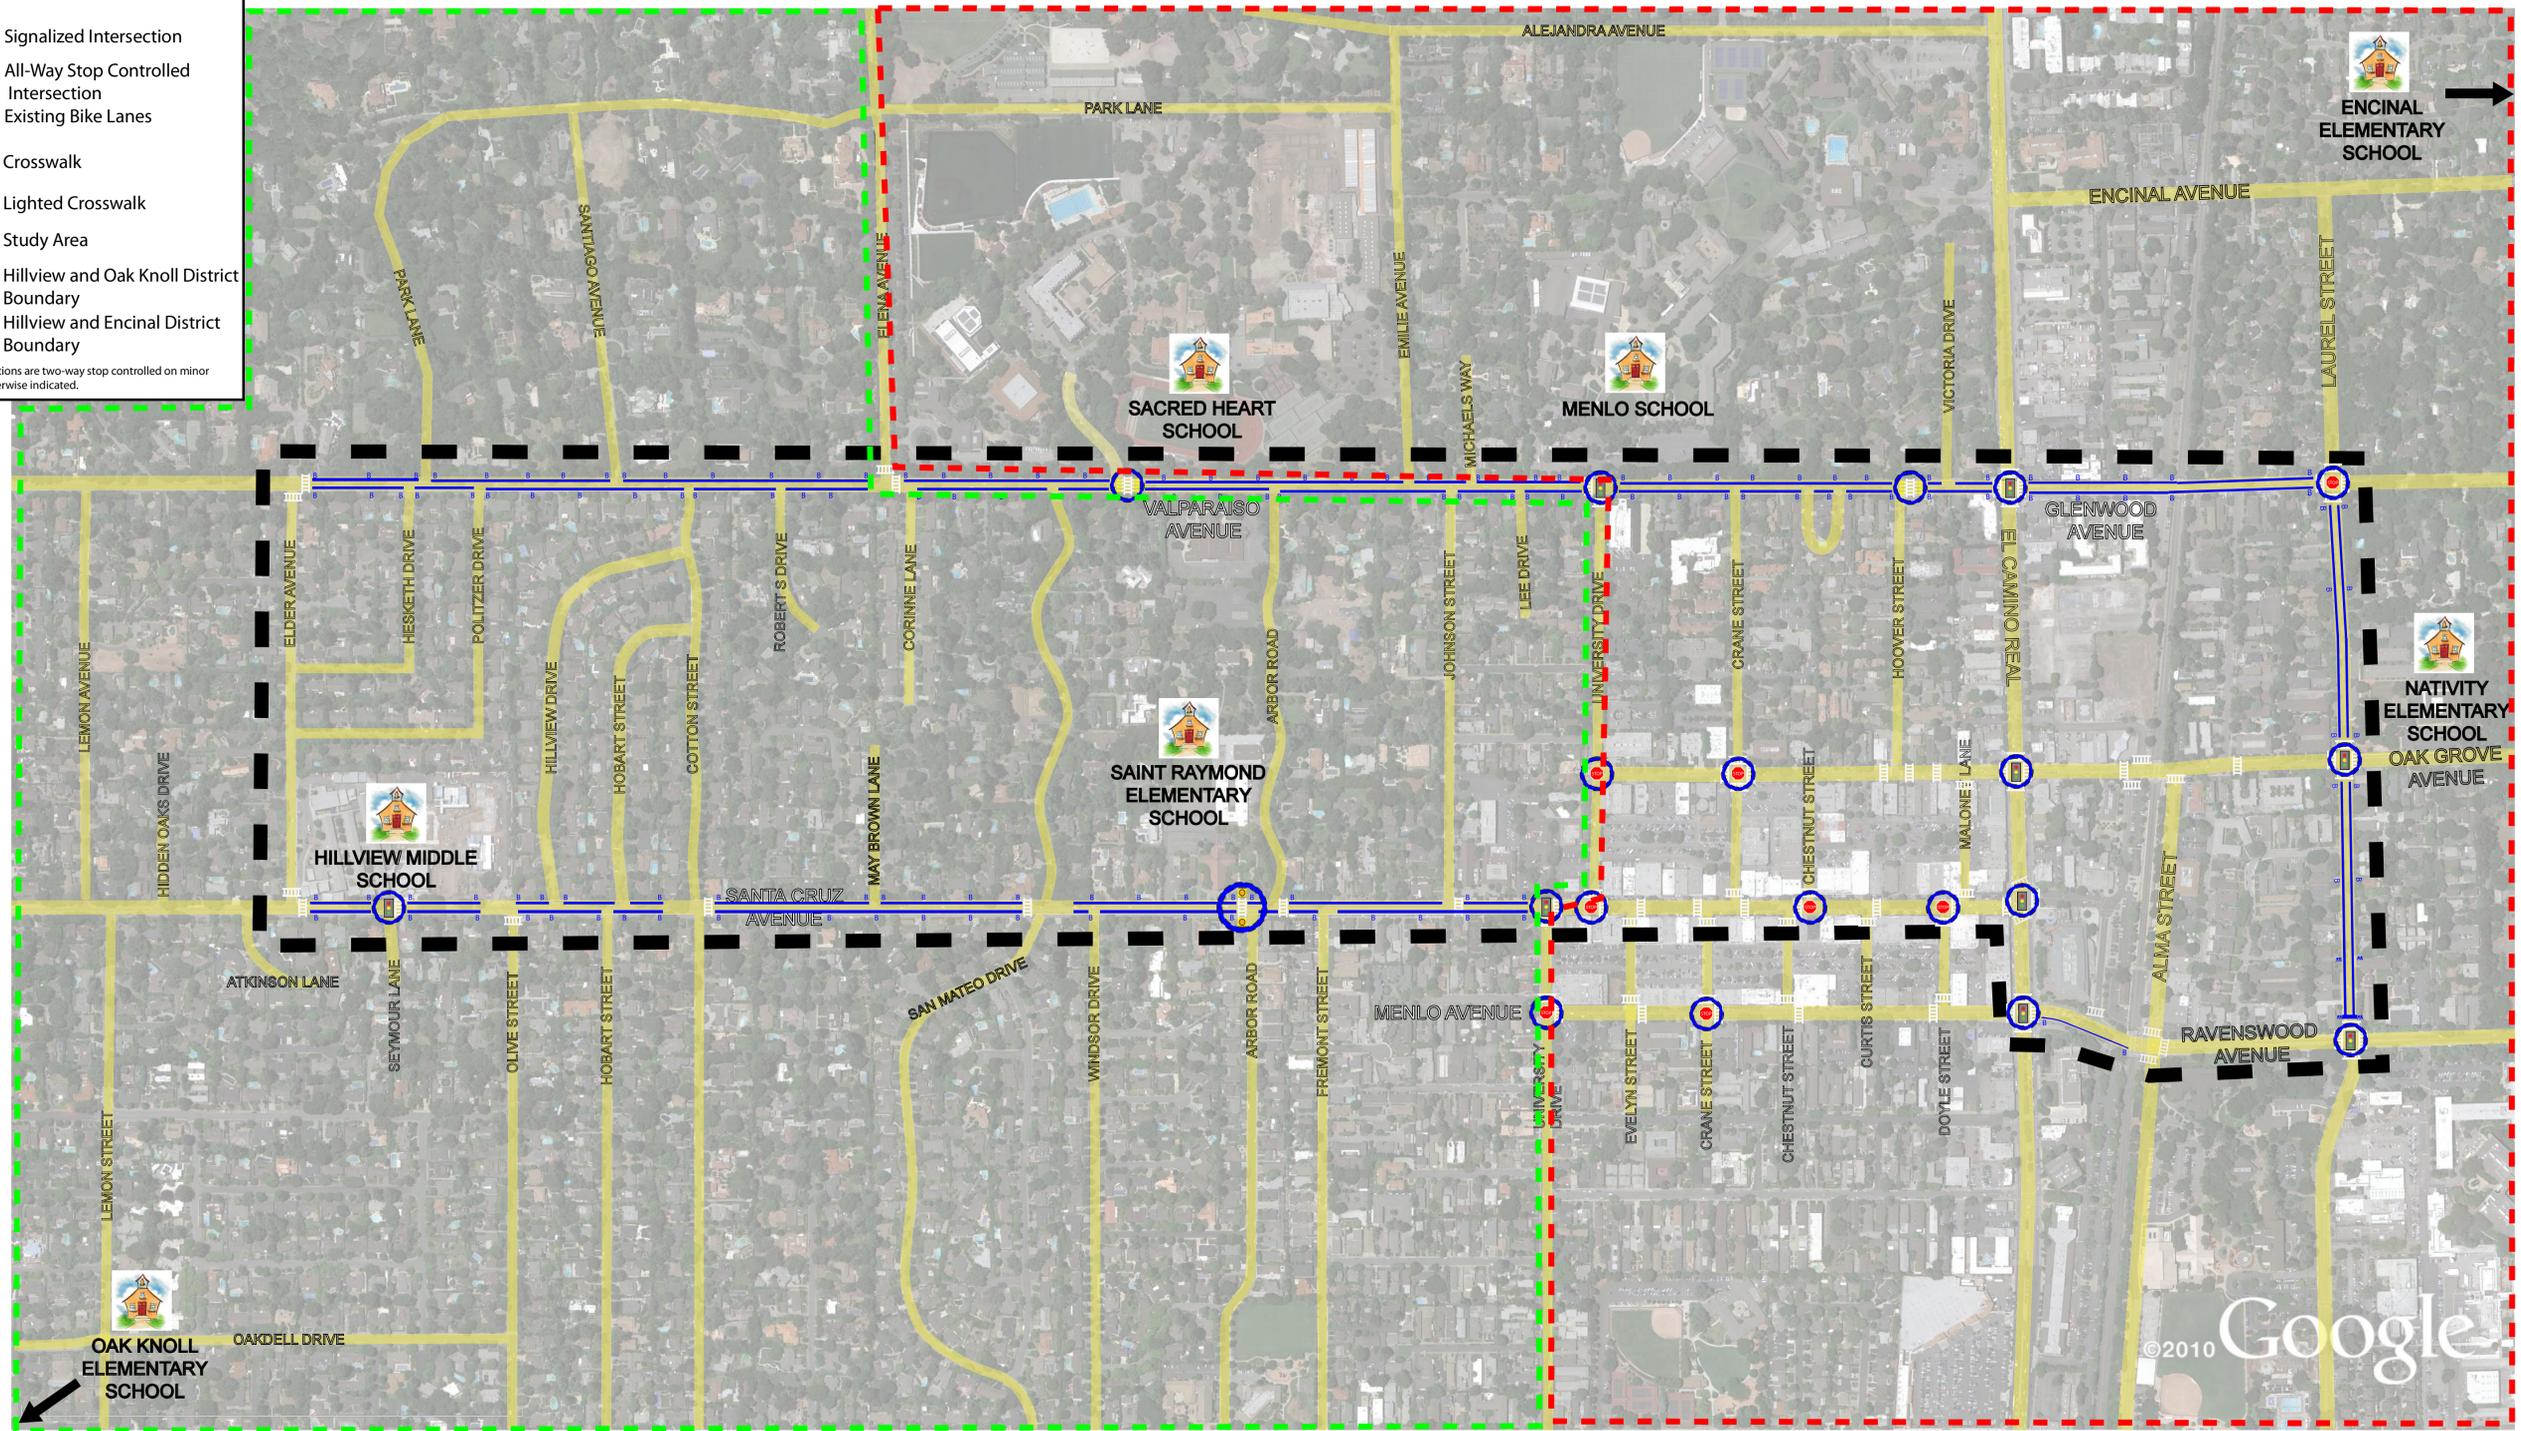

The SR2S plan is intended to create safe and convenient opportunities for children (and adults) to bicycle and walk to school. Secondary benefits to children and their neighborhoods include improved health, reduced traffic congestion and speeding, better air quality, and enhanced neighborhood safety.

Menlo Park - Valparaiso Safe Routes to School Plan

NOT TO SCALE

EXISTING CONDITIONS

Data Collection

In an effort to gather pertinent data related to the Valparaiso Avenue SR2S Study Area, the following agencies were contacted to request available and applicable documentation:

- City of Menlo Park
- County of San Mateo, Public Works
- Town of Atherton
- Menlo Park School District
- Menlo School
- Sacred Heart School

The following is a summary of the information received from the contacted agencies and preliminary observations concerning the data collected.

Information pertaining to existing conditions was also obtained from members of the steering committee assisting the City on this project.

Vehicular Turning Movement Counts and Pedestrian Counts

Vehicular turning movement counts were collected at the following locations in December 2007 and December 2009 during the AM and school PM peak traffic periods (7:00-9:00 AM and 2:00-4:00 PM). The counts were obtained from the *Menlo School Traffic Impact Study – Final Report*¹ and the *Hillview Middle School Expansion Traffic Impact Analysis*².

- El Camino Real and Valparaiso Avenue / Glenwood Avenue
- Valparaiso Avenue and University Drive
- Valparaiso Avenue and Michaels Way
- Valparaiso Avenue and Johnston Street
- Valparaiso Avenue and Emilie Avenue
- Valparaiso Avenue and Arbor Road
- Valparaiso Avenue and San Mateo Drive
- Valparaiso Avenue and Elena Avenue
- Valparaiso Avenue and Cotton Street
- Park Lane and Emilie Avenue
- Park Lane and Elena Avenue
- Santa Cruz Avenue and Cotton Street
- Santa Cruz Avenue and Hillview Drive
- Santa Cruz Avenue and Olive Street

¹ *Menlo School Traffic Impact Study – Final Report*, Kimley-Horn and Associates, Inc., May 2011.

² *Hillview Middle School Expansion Traffic Impact Analysis*, DKS Associates, October 2008.

- Santa Cruz Avenue and Elder Avenue
- Santa Cruz Avenue and Orange Avenue

Pedestrian counts were collected at the following intersections in December 2011 and January 2012 during the AM peak and school PM peak traffic periods (7:30-9:00AM and 2:30-3:30PM):

- Santa Cruz Avenue and Elder Avenue
- Santa Cruz Avenue and University Avenue
- Valparaiso Avenue and University Avenue
- Valparaiso Avenue and Elder Avenue

The pedestrian counts are included as **Appendix 1A**.

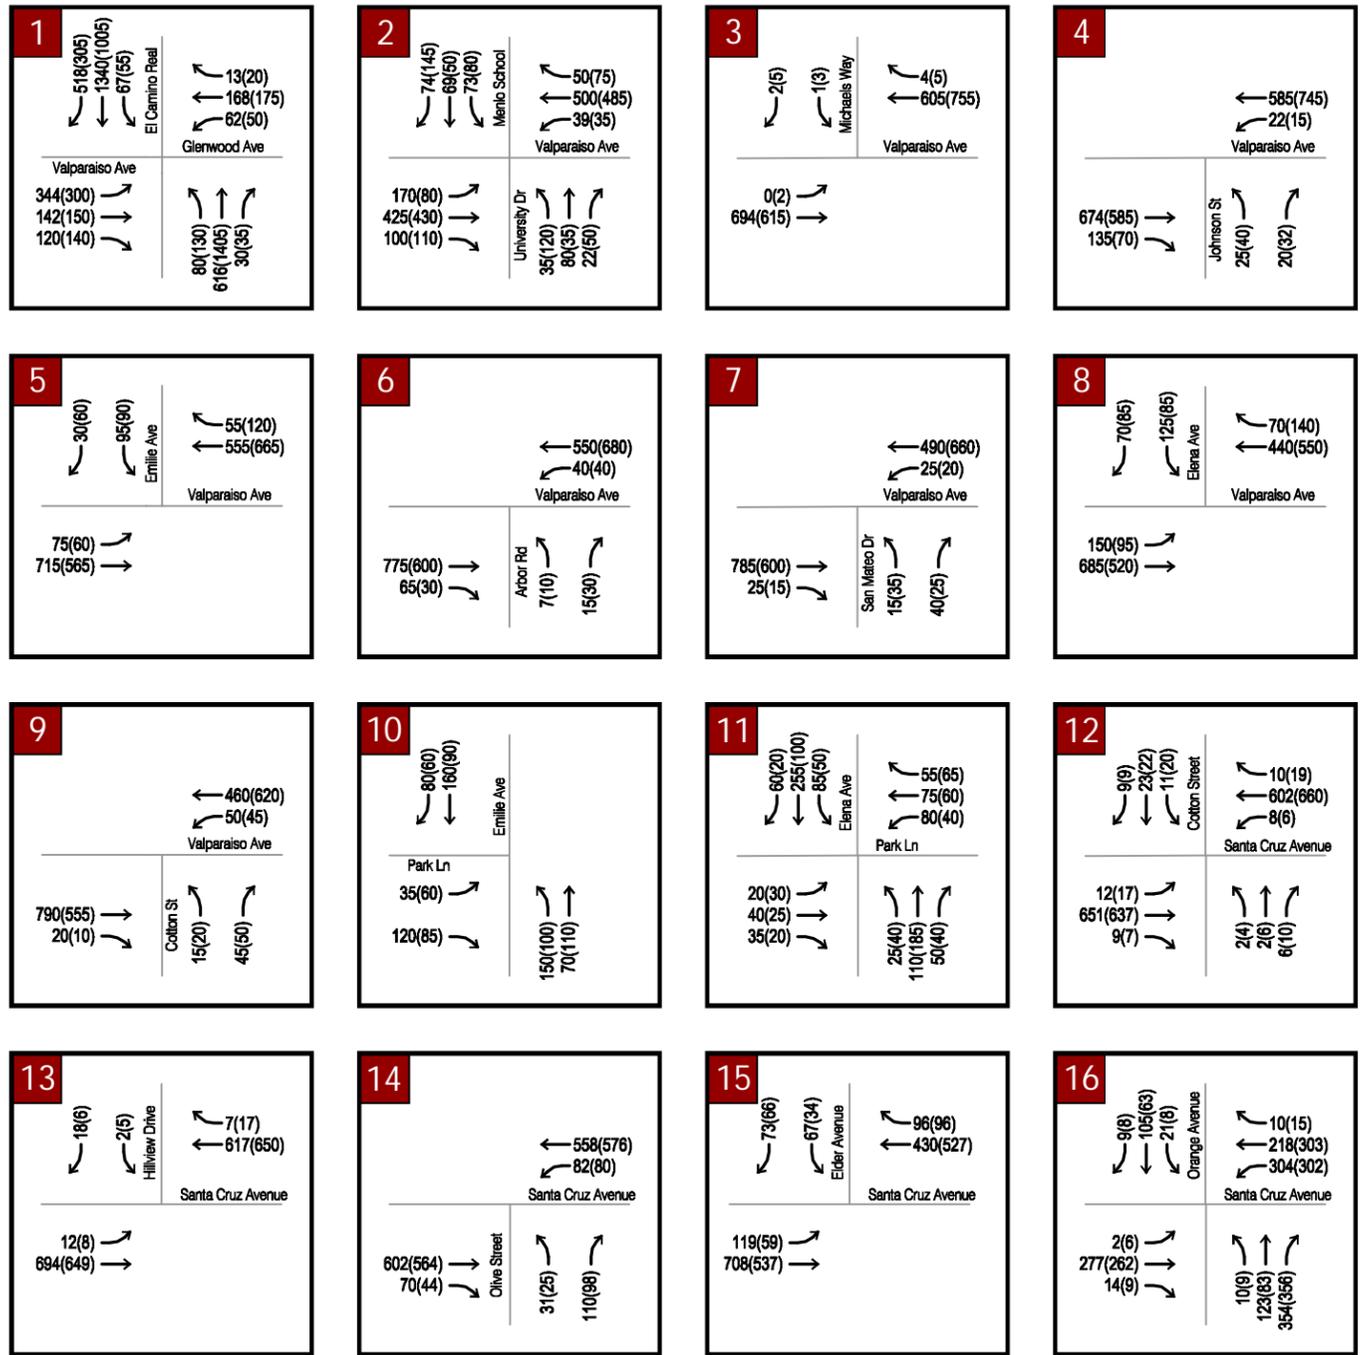

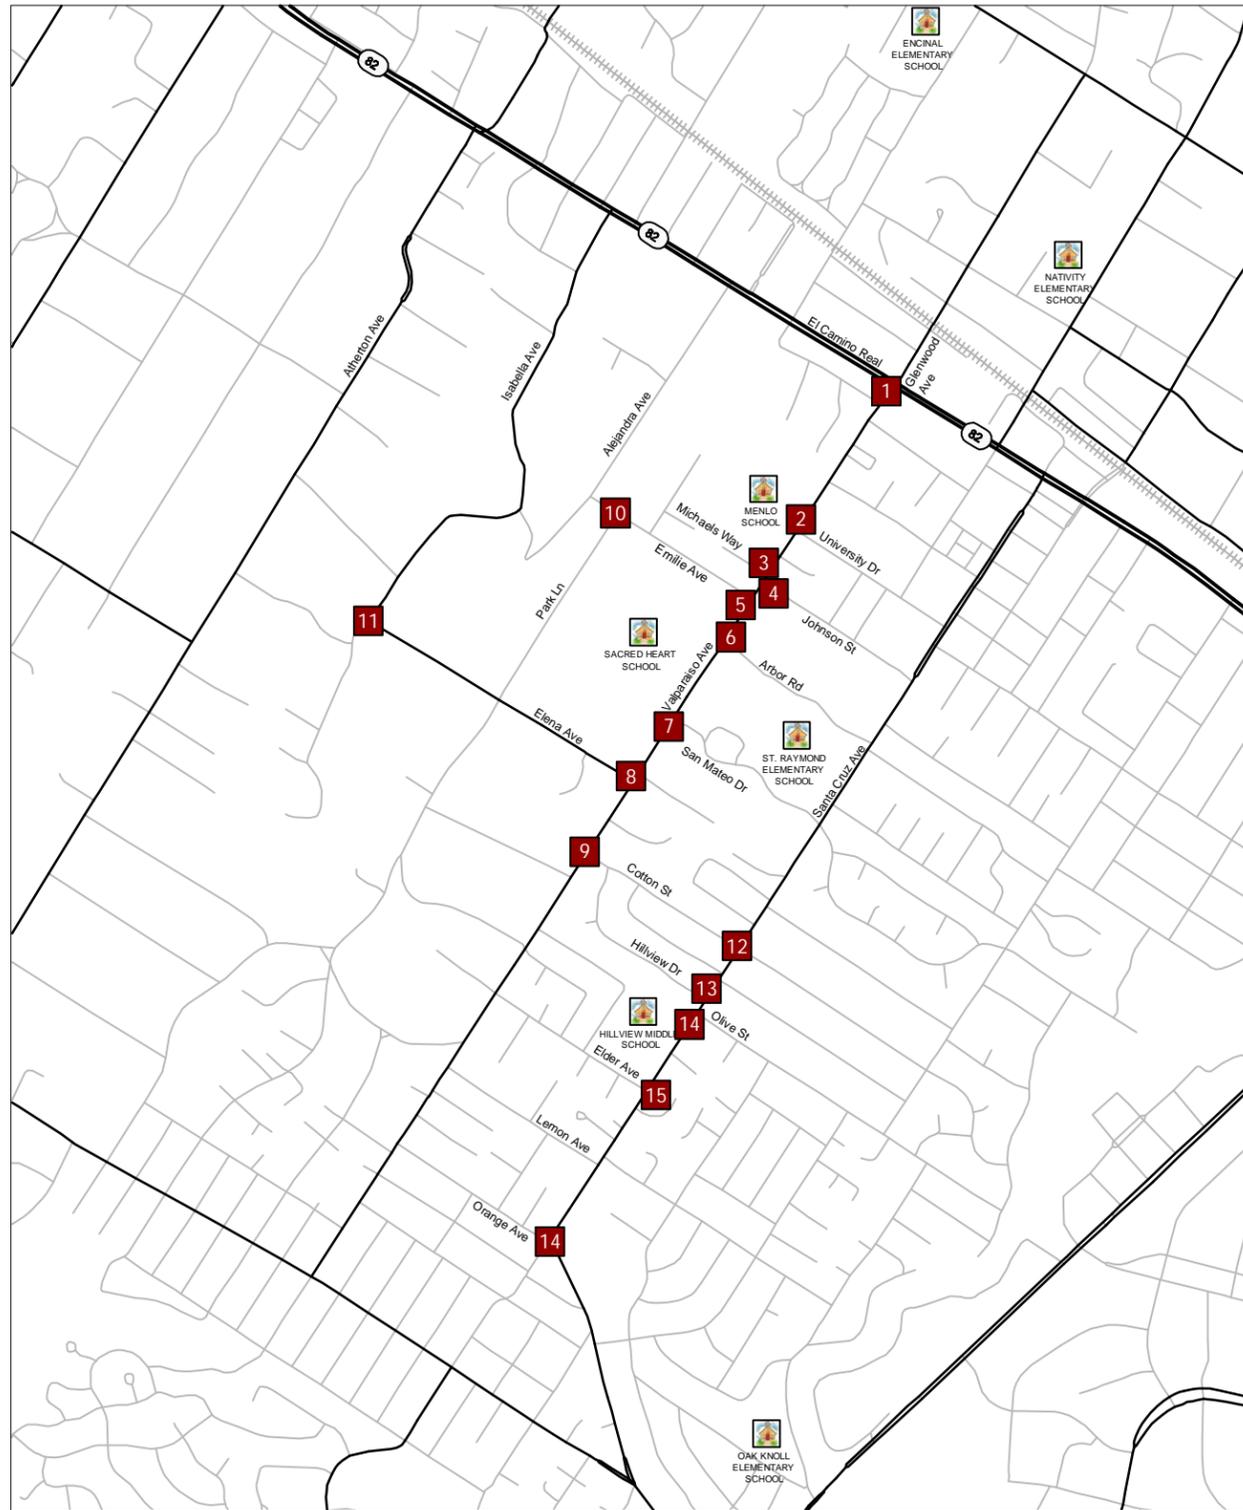

The vehicular turning movement count data was summarized to determine trends in peak period vehicular traffic volumes. **Figure 2** illustrates the vehicle turning movement counts during AM and school PM peak traffic periods. **Figure 3** illustrates the pedestrian volume counts during the AM and school PM peak traffic periods.

Vehicular Speed Surveys

Vehicular speed data was collected at the following locations in October 2007:

- Valparaiso Avenue between El Camino Real and Cotton Street
- Valparaiso Avenue between the City limit and Cotton Street
- Santa Cruz Avenue between the City limit and Olive Street
- Santa Cruz Avenue between Olive Street and University Avenue
- Santa Cruz Avenue between University Avenue and El Camino Real

The speed data collected is included as **Appendix 1B**.

FIGURE 2
VEHICLE TURNING MOVEMENT COUNTS

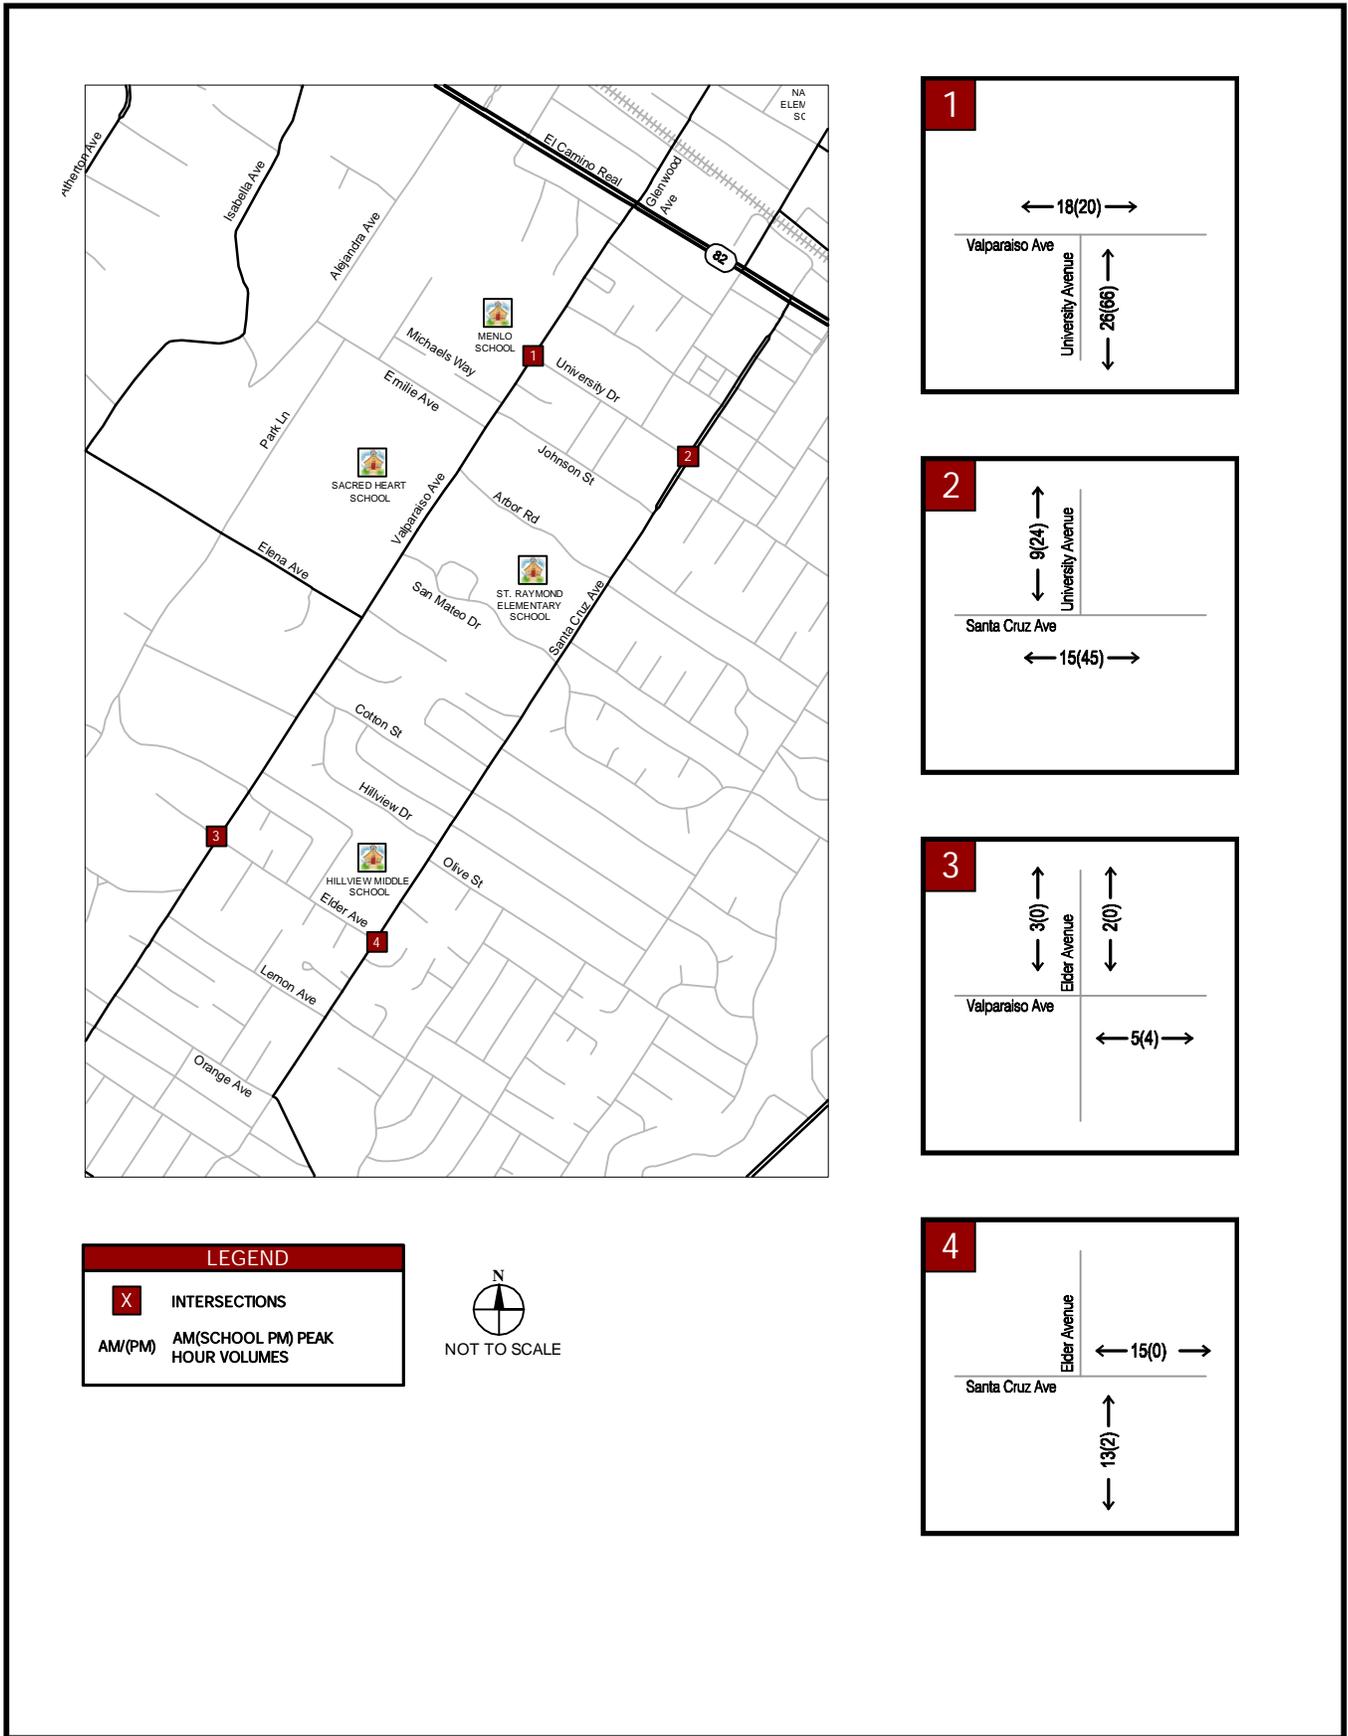

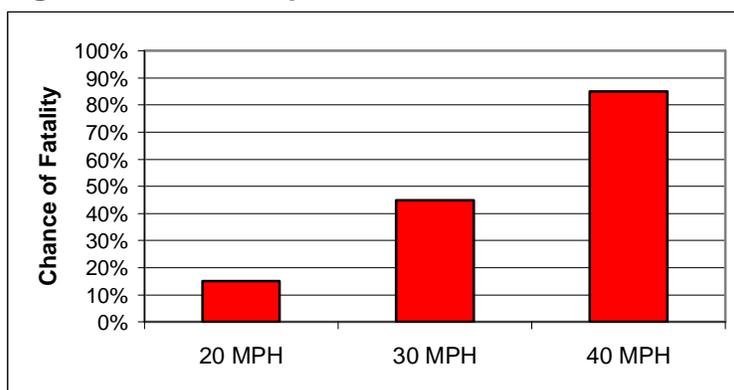

FIGURE 3
PEDESTRIAN VOLUME COUNTS

As shown in **Figure 4**, maintaining speeds at or below the speed limit is significant with regard to pedestrian and bicyclist safety. According to studies in the United Kingdom, a pedestrian or bicyclist struck by a vehicle traveling at 20 mph has a 15% chance that the collision will be fatal. However, when the speed is 30 mph, the likelihood of a fatality increases to 45%, and jumps to 85% at 40 mph. This information reinforces the need to provide safe and separate traveled ways for pedestrians, bicycles, and motor vehicles. Currently, many locations throughout the study area provide no separate delineation for these three travel modes and, thereby, raise the probability of an incident occurring between a motor vehicle and a pedestrian or bicycle.

Figure 4: Vehicle Speeds vs. Pedestrian Fatalities

Speed limits are primarily established to protect the public from the unreasonable behavior of reckless, unreliable, or otherwise dangerous drivers. Speed limits are generally established at or near the 85th percentile speed (per the California Vehicle Code³), which is defined as the speed at or below which 85% of traffic is moving. The 85th percentile speed should also fall within the 10 mph pace. The 10 mph pace is the 10 mph increment range that contains the largest number of recorded vehicles. Speed limits established on this basis conform to the consensus of those who drive on the roadways as to what speed is reasonable and safe, and is not dependent on the judgment of one or a few individuals. In some cases, speed limits may be established outside of this guideline based on a field review of roadway, and traffic variables in combination with statistical data and collision history of a particular roadway segment to determine a safe and reasonable speed limit.

Speed survey data provided for Valparaiso Avenue and Santa Cruz Avenue is summarized below in **Table 1**. Vehicles traveling on Valparaiso Avenue between Cotton Street and El Camino Real were found to travel at an 85th percentile speed of 36.7 mph, which is near the posted speed limit of 35 mph. Vehicles traveling on Valparaiso Avenue between the City Limit and Cotton Street were found to travel at an 85th percentile speed of 39.1 mph, which is higher than the posted speed limit of 35 mph. On Santa Cruz Avenue between the City limit and Olive Street, vehicles were found to travel at an 85th percentile speed of 33.6 mph, which is slightly higher than the speed limit of 30 mph. On Santa

³ California Vehicle Code, California Department of Motor Vehicles. 2012.

Table 1: Speed Survey Data

Roadway	Posted Speed	Average Speed	85th Percentile Speed	10 mph Pace	Speed > 10mph over Limit
Valparaiso Avenue (Cotton St to El Camino Real)	35 mph	34.2 mph	36.7 mph	29-39 mph	0 of 122 vehicles
Valparaiso Avenue (City Limit to Cotton St)	35 mph	36.0 mph	39.1 mph	30-40 mph	2 of 134 vehicles
Santa Cruz Avenue (City Limit to Olive St)	30 mph	30.5 mph	33.6 mph	26-36 mph	1 of 128 vehicles
Santa Cruz Avenue (Olive St to University Ave)	30 mph	32.1 mph	35.6 mph	26-36 mph	1 of 128 vehicles
Santa Cruz Avenue (University Ave to El Camino Real)	25 mph	19.8 mph	23.1 mph	15-25 mph	0 of 120 vehicles

Source: City of Menlo Park, 2008.

Cruz Avenue between Olive Street and University Avenue, vehicles were found to travel at an 85th percentile speed of 35.6 mph, which is higher than the speed limit of 30 mph. On Santa Cruz Avenue between University Avenue and El Camino Real, vehicles were found to travel at an 85th percentile speed of 23.1 mph, which is less than the speed limit of 25 mph. Speeds at this location were low due to the tight travel lanes in both directions bordered by a median and diagonal parking spaces. This study will evaluate options to affect the speed of vehicles traveling on Valparaiso Avenue and Santa Cruz Avenue.

Collision Data

Collision data was provided by the City of Menlo Park and the Town of Atherton for the Valparaiso Avenue SR2S study area for the years 2006 through 2011. Collision data from each corridor is included as **Appendix 1C**.

The collision data provided for the study area is summarized below in **Table 2**. The majority of the collisions occurred on Valparaiso Avenue and Santa Cruz Avenue. This was expected since these are the two main thoroughfares in the study area and the other streets are side streets. It should be noted that collision trends are showing an overall reduction in collisions in the study area and specifically on Valparaiso Avenue and Santa Cruz Avenue.

Pedestrian and bicycle collision data was provided for the study area and is summarized below in **Table 3**. The majority of the pedestrian and bicycle collisions occurred on Valparaiso Avenue and Santa Cruz Avenue. This was expected since these two roadways had the majority of collisions in the study area.

Table 2: All Collision Information

Roadway	Collisions recorded on each roadway each year				
	2007	2008	2009	2010	2011
Elena Avenue	1	2	1	0	0
Emilie Avenue	0	2	1	1	0
Park Lane	2	1	1	0	0
Valparaiso Avenue	9	21	6	13	4
Elder Avenue	3	1	0	1	0
San Mateo Drive	3	1	0	2	1
Santa Cruz Avenue	27	39	33	21	16

Table 3: Pedestrian and Bicycle Collision Information

Roadway	Pedestrian and Bicycle Only Collisions recorded on each roadway each year				
	2007	2008	2009	2010	2011
Elena Avenue	0	2	0	0	0
Emilie Avenue	0	1	0	0	0
Park Lane	0	0	0	0	0
Valparaiso Avenue	0	4	2	1	0
Elder Avenue	0	0	0	0	0
San Mateo Drive	1	2	0	0	0
Santa Cruz Avenue	3	3	2	2	2

School Residences

Student enrollment information was gathered from the local schools within the study area to assess the distribution of trips. This information will give a better idea of the main routes that students take to get to each school, and assist in identifying which corridors should be the focus of improvements. Student address information was collected and is described below for Menlo School, Oak Knoll School, Sacred Heart School, Encinal School, Hillview School, and St. Raymond Elementary School.

Figure 5 illustrates the residence locations for the student enrollments at Menlo School. Residences for Menlo School come from multiple cities and even different counties. From the residence location data provided, it was determined that most students and parents likely use El Camino Real, Glenwood Avenue, Valparaiso Avenue, and University Avenue. Some of the more local families likely use the side streets off Valparaiso Avenue to access the school.

Figure 5: Menlo School Student Addresses

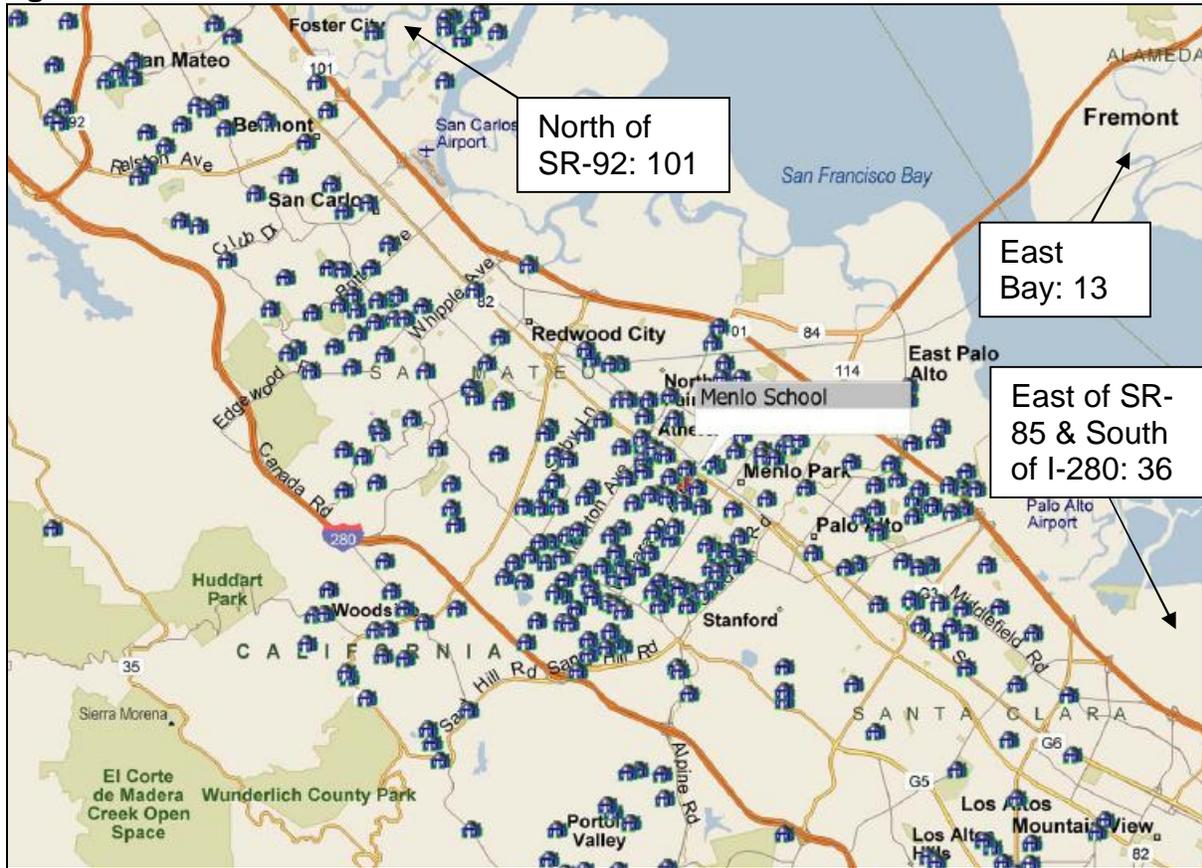

Figure 6 illustrates the residence locations for the student enrollments at Oak Knoll School. A majority of the residences for the Oak Knoll School reside in the local nearby neighborhoods. These residents would likely use Valparaiso Avenue and Santa Cruz Avenue as the major arterials to arrive at Oak Knoll. There are additional residences from East Palo Alto.

Figure 6: Oak Knoll School Student Addresses

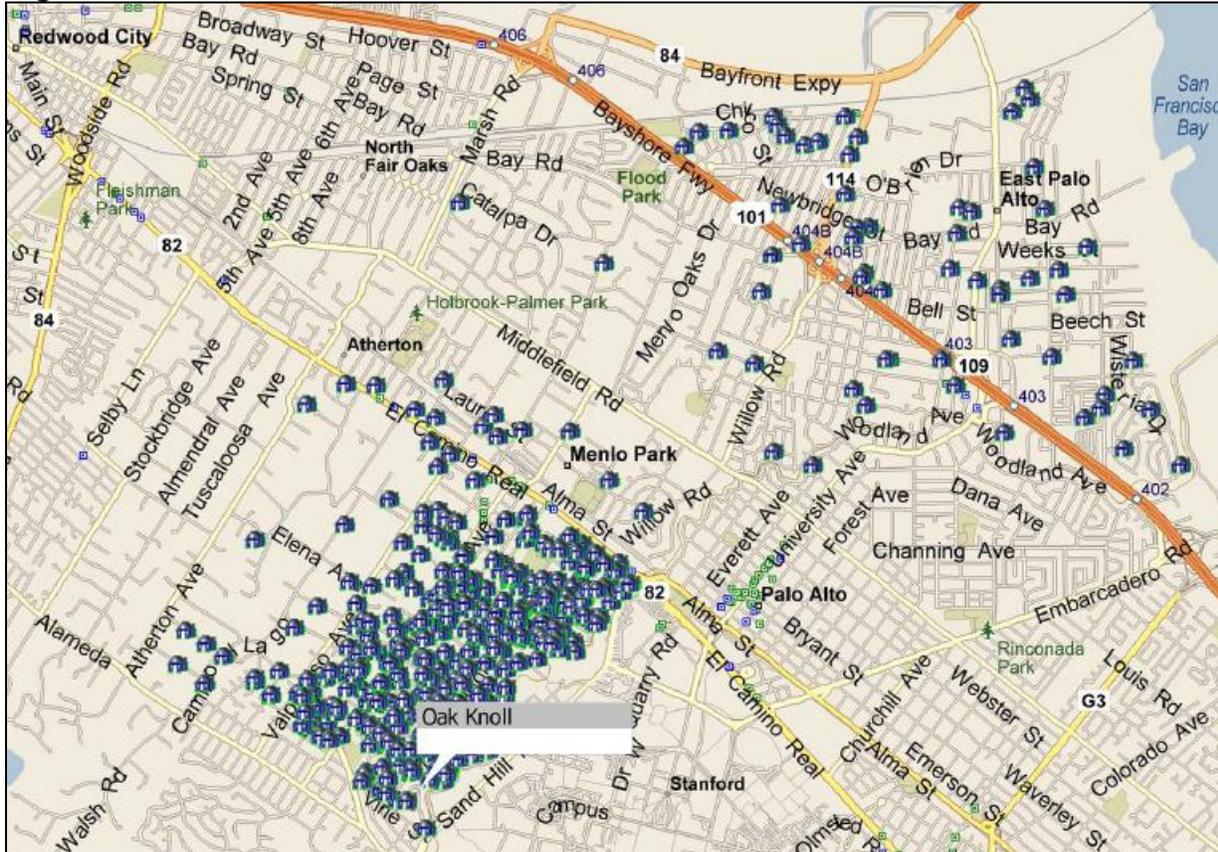

Figure 7 illustrates the residence locations for the student enrollments at Sacred Heart School. Residences for Sacred Heart School come from multiple cities and even different counties. From the residence location data provided, it was determined that most students and parents likely use El Camino Real, Glenwood Avenue, Valparaiso Avenue, and University Avenue. Some of the more local families likely use the side streets off Valparaiso Avenue to access the school.

Figure 7: Sacred Heart School Student Addresses

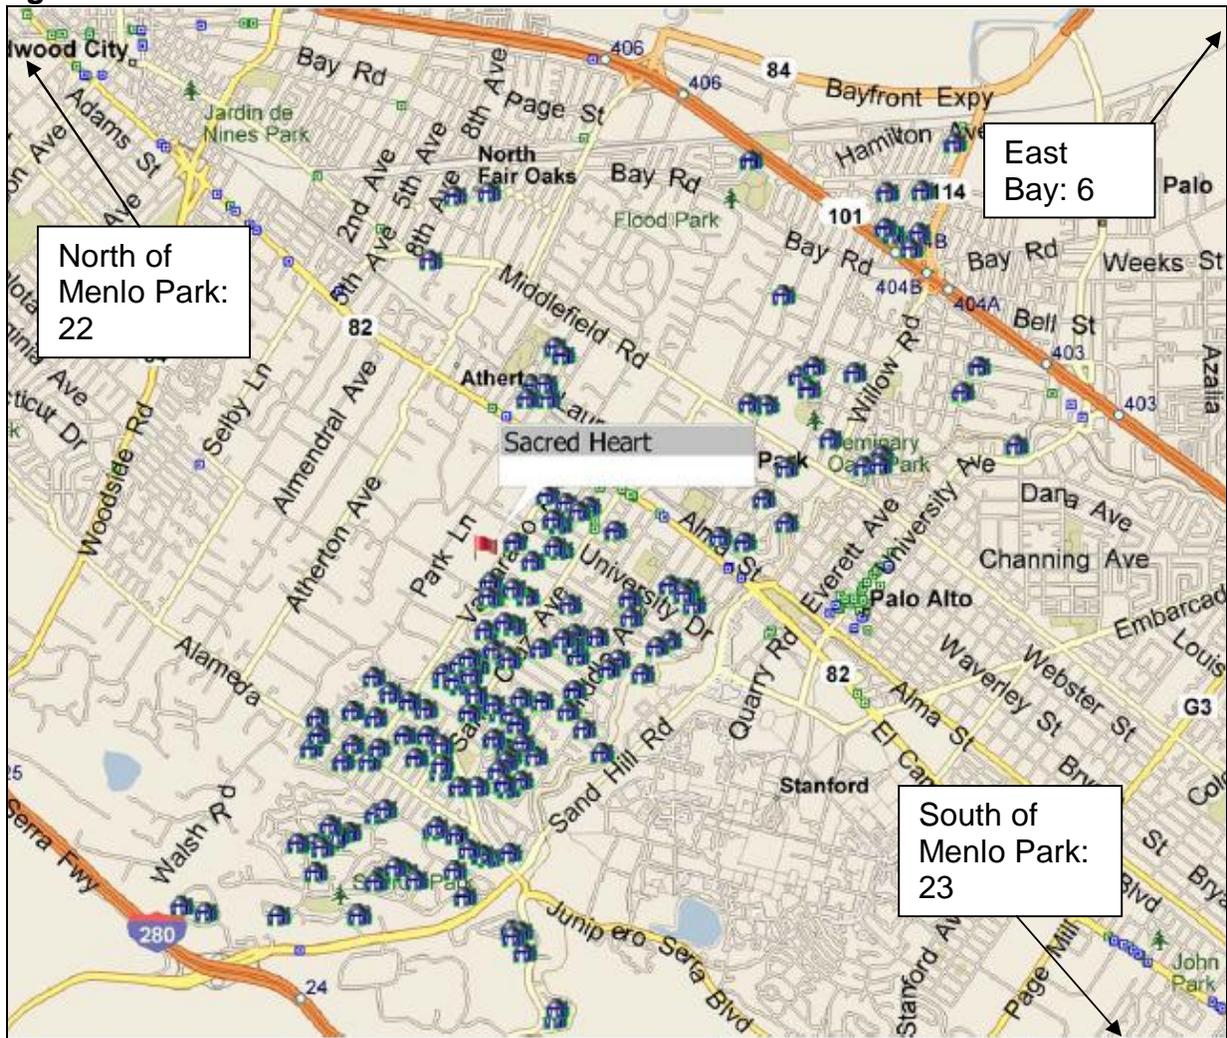

Figure 8 illustrates the residence locations for the student enrolled at Encinal School. Residences for Encinal School primarily come from Menlo Park and Atherton. From the residence location data provided, it was determined that most students and parents likely use Middlefield Road, Ringwood Road, Marsh Road, El Camino Real, Glenwood Avenue, Encinal Avenue, and Willow Road.

Figure 8: Encinal School Student Addresses

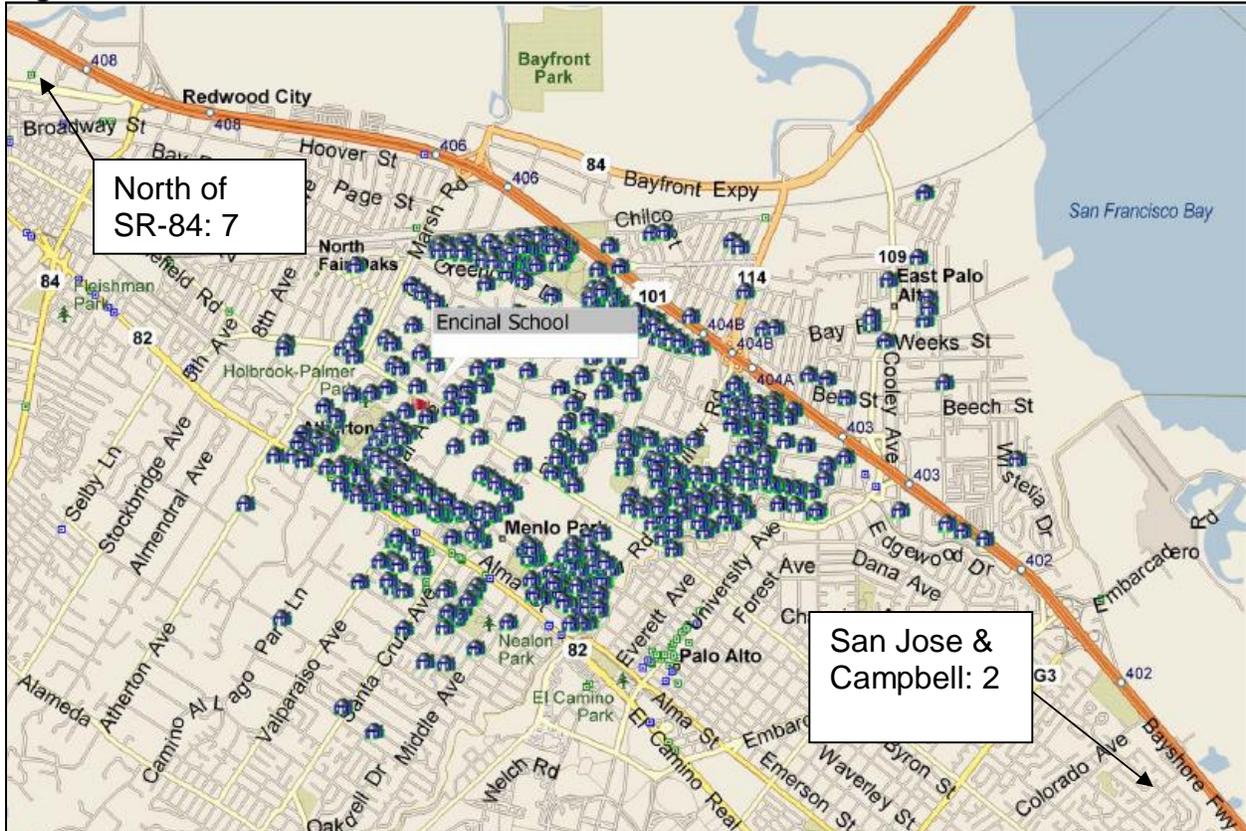

Figure 10 illustrates the residence locations for the student enrolled at St. Raymond Elementary School. Residences for St. Raymond Elementary School primarily come from Menlo Park, Atherton, and Redwood City. From the residence location data provided, it was determined that most students and parents likely use El Camino Real, Valparaiso Avenue, Santa Cruz Avenue, and Alameda de Las Pulgas.

Figure 10: St. Raymond Elementary School Student Addresses

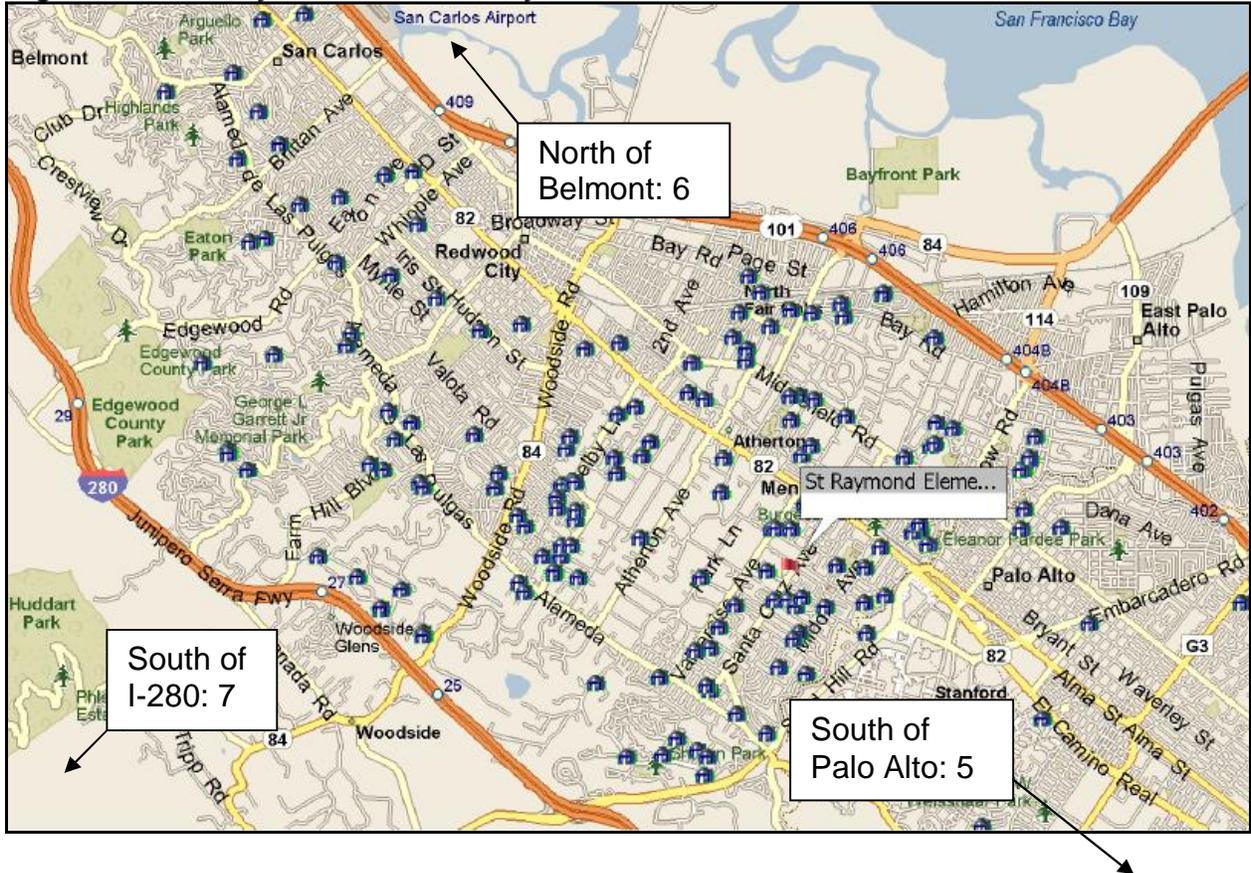

Table 4 summarizes enrollment information received for each of the schools discussed above. The table specifically identifies the number of students that reside within and outside of the Menlo Park City Limits to better understand which Menlo Park roadways are being used most often.

Table 4: School Enrollment Within and Outside Menlo Park City Limits

School	Students Within Menlo Park City Limits	Students Outside Menlo Park City Limits	Total Students
Menlo School	110	712	822
Oak Knoll	655	75	730
Sacred Heart	174	658	832
Encinal School	627	149	776
Hillview School	674	136	810
St. Raymond Elementary School	94	266	360
Total	2334	1996	4330

ALTERNATIVES DEVELOPMENT & PUBLIC PROCESS

Public Process

The process for developing the Valparaiso SR2S Plan included a specific and detailed input process to assure that the plan appropriately responded to the combined concerns of citizens, parents, school-aged children, district administrators, engineering staff, and elected officials. To assure that input was received in a constructive manner, a process was developed early in the project to conduct meetings with each of these stakeholder groups at regular intervals throughout the project. Below is a listing of each meeting forum for the project, meeting dates, and meeting objectives. Handouts and other presentation materials discussed or circulated at each of the following meetings are included in the Appendix.

1. **Kickoff Meeting** (September 20, 2011) – The first project team meeting served as a kickoff meeting to discuss project goals and objectives, issues and concerns, and information to be presented at the first Public Meeting. The project team consisted of the following Steering Committee members:
 - Kimley-Horn and Associates (Michael Mowery)
 - Menlo Park (Atul Patel and Rene Baile)
 - Town of Atherton (David Huynh)
 - Menlo Park City School District (Ahmad Sheikholeslami)
 - Sacred Heart Schools (Sandra Dubinsky and Maureen Hogan)
 - Menlo School (Kevin Conner)
2. **Public Meeting #1** (November 10, 2011) – The first Neighborhood Meeting was an opportunity to discuss the project background, goals, and objectives, and to give the community an opportunity to provide their comments, issues, and suggestion for the project. The first public meeting was targeted at parents, administrators, and other school-related groups by inviting the Steering Committee and representatives from the Parent-Teacher Association or Organization (PTA/PTO) from each school represented in the study. Twelve participants representing most of the study area schools attended this meeting. Kimley-Horn and Menlo Park staff received more than 90 minutes of comment at this meeting.
3. **Public Meeting #2** (March 29, 2012) – The second Public Meeting was focused on the presentation of the existing conditions data for the study and the presentation of improvement alternatives in the overall study area. After approximately a 30 minute presentation of project information, meeting attendees were broken into smaller groups for roundtable discussions of the improvement alternatives. Kimley-Horn and Menlo Park staff received more than 90 minutes of public comment at this meeting. The second public meeting was noticed to all study area residents, twenty residents attended the meeting. Based on feedback from the Public Meeting, some refinements were made to the Plan before the subsequent Public Meeting.
4. **Public Meeting #3** (May 30, 2012) – The third Public Meeting was focused on the presentation of the improvement alternatives as well as follow-up on comments and questions received in the first two public meetings. After

approximately a 20 minute presentation of project information, meeting attendees were broken into smaller groups for questions and comments concerning the proposed plan. Kimley-Horn and Menlo Park staff received more than 60 minutes of public comments at this meeting. The third public meeting was noticed to all study area residents, ten residents attended the meeting. Based on feedback from the Public Meeting, some refinements were made to the Plan before the subsequent Commission meetings.

5. **Transportation Commission Meeting #1** (June 13, 2012) – The first Transportation Commission Meeting presented similar information as the recent Neighborhood Meeting, that is, the existing conditions and current improvement alternatives. The comments and concerns raised at the recent Public Meetings were discussed and additional comments were received from the Commissioners. Specific comments made by the Commissioners are summarized below with responses in parenthesis:
- Could the left-turn widening option be combined with the other improvements noted throughout the study area and be funded by the maximum grant funding threshold? *(The left-turn widening option is considered to be a Phase 2 project due to the expected overall cost of a combined SR2S project exceeding the grant funding threshold. Additional funding resources for left-turn widening may be available through other grant programs.)*
 - Comment that the bike lane delineation dots are not the preferred option to enhance the bike lane visibility but rather the green paint option is preferred. *(The green bike lanes option has been prioritized as the preferred bike lane treatment on Valparaiso Avenue based on the Commission and Public comments.)*
 - Would the AT&T franchise agreement cover the cost of pole relocation in the Phase 2 Valparaiso widening alternatives? *(City staff confirmed that the AT&T franchise agreement should cover the cost of pole relocation, thereby reducing the cost of the potential Phase 2 widening options.)*
 - Comment regarding that unincorporated San Mateo County students attend study area school and resident drive Valparaiso Avenue and a question was received if the study should be widened to include a larger portion of Valparaiso Avenue. *(City staff noted that the study area was defined through a project scoping meeting and approved by City Council and areas outside of Menlo Park were not included.)*
 - Comment that student resident information should be included in the project to determine the correct study area and paths children will utilize. *(Student resident information was requested from each of the study area schools and included in the Existing Conditions assessment for those schools where information was provided.)*
 - Comment to better understand if grant funding can be used for education and encouragement. *(City staff noted that a portion, up to 10%, of grant funding dollars can be used for education and encouragement.)*
 - Comment that too many signs were included in the Draft Plan. *(Some signs were removed from the plan to prevent sign clutter and the green bike lane painting was selected to reinforce the bicycling area.)*
 - Comment regarding traffic signal shown as an option on Valparaiso Avenue at Elena Avenue or Emile Avenue. *(Signal warrants are currently not met for either intersection location; however, continued monitoring of these intersections is anticipated to determine if a signal may be installed in the future.)*
 - Comment regarding potential removal of parking on Valparaiso Avenue for the Phase 2 option. *(If the left-turn widening option is selected to go forward then*

specific outreach would be held with property owners to determine if this design option may go forward.)

- Comment that many elements are included in the plan and more information is requested to understand the reason for each element included, especially the lighted signs in front of resident properties. *(City staff will follow-up on the recommendation to discuss sign and other element placement with area stakeholders that have not yet been consulted on the Plan.)*
6. **Bicycle Commission #1** (July 9, 2012) – The first Bicycle Commission Meeting presented similar information as the Transportation Commission meeting, with additional focus on improvements effecting cyclists. The comments and concerns raised at the recent Public Meetings were discussed and additional comments were received from the Commissioners. Specific comments made by the Commissioners are summarized below with responses in parenthesis:
- Consider adding turn lanes on Valparaiso at busiest locations to ease congestion. *(Left turn lanes are already being considered on Valparaiso as a potential Phase 2 to the SR2S Plan.)*
 - Consider running split signal phasing at Menlo School. With the permitted phasing it is common for southbound lefts to turn in front of northbound through and rights who have the right of way. *(Signal timing changes already included as part of the SR2S Plan.)*
 - Make adjustments to the bikeway near Menlo School where it passes behind the tree. Improve pavement surface and provide signal to more positively stop cyclists from riding thru when cross traffic is moving. Can the road be widened in this area so bike traffic doesn't have to go behind the tree? Consider eliminating the WB left turn lane to make room. *(The location of the tree and traffic signal cabinet make relocation of the bike lane costly. City staff is concerned that elimination of the WB left turn lane will relocate left turns to other uncontrolled intersections rather than as a protected movement at the University Avenue intersection.)*
 - Add green paint to all bikeways in the study area. *(City staff typically deploys new traffic technologies and striping at one location for evaluation prior to deployment throughout the City. Potential future locations for green bicycle lanes for Santa Cruz Avenue will be considered further once grant funding has been awarded.)*
 - Conduct before and after bike and pedestrian counts to document the benefit of the improvements. *(Before bike and pedestrian counts have been collected as part of this study, after study counts will be conducted at a later date after grant funding is received and improvements deployed.)*
 - How many children travel from outside of the study area to schools in the study area? Are there any other routes or facilities that need improvement to assist these children? *(This information has been included in the existing conditions section of this document.)*
7. **Transportation Commission Meeting #2** (August 15, 2012) – The 2nd Transportation Commission included City staff receiving comments on the Draft Final SR2S Plan, as well as other general comments concerning the plan. Specific comments made by the Commissioners are summarized below with responses in parenthesis:
- Staff was requested to summarize the comments they provided to Kimley-Horn concerning the Draft Final SR2S Report. *(Staff responded that they noted grammatical issues and had some follow-up questions concerning the report and that all comments had been incorporated into the report reviewed by the Commission.)*

- A request was made to have the report reviewed by a copy editor to identify and resolve confusing language in the report. Commissioner Bourne provided specific comments in writing to City staff. (*The next version of the report included this review and resolution of the language or confusing items identified.*)
- Question regarding what input the Town of Atherton has provided on the project and if any cost sharing has been discussed. (*Town staff has participated throughout the project. City staff and Kimley-Horn presented to the Atherton Traffic Committee on September 11, 2012 and comments received are included herein.*)
- Statement that the vehicle speed data included is useless for the study. (*Speed data for the study was scoped only to include the completed Speed Survey data legally required for update every 5 years, no other vehicle speed data was collected for the study.*)
- Question regarding why Hillview School and St. Raymond's School student enrollment data was not included in the report. (*Data from each school was requested and previously not received. Data has recently been received for student enrollment from each school and is included herein.*)
- Comment that the inclusion of Encinal and Oak Knoll makes the study area and the findings confusing. (*Inclusion of students that attend each school was part of the initial scoping process completed with City Council approval.*)
- Comment that collision data included is too old and should be better organized. (*The most recent collision data available to City staff has been included in the report. Improved organization of collision data has been incorporated.*)
- Some side streets do not appear to be studied as part of the recommendations (e.g. Olive Street, San Mateo Street, etc.). (*Each of the side streets within the study area, and specifically around schools within the study area were included in the study. Fewer recommendations have been included along these side street locations to prioritize improvements on the more major roadways where a larger volume of bicycles, pedestrians, and vehicles travel.*)
- Request to identify the origin of the pedestrian count data contained in the Appendix. (*Pedestrian counts were conducted by City intern staff and will be labeled as such in the Appendix.*)
- Request to better understand how speed and collision data were evaluated and resulted in the recommendations included in the study. (*Further explanation of the proposed measures and their potential impact on reduction in speeds and collisions has been included herein.*)
- Request to reach out to residents concerning potential removal of parking if additional lanes are installed and the status of that outreach. (*City staff will discuss the parking item with residents that may be affected should additional lanes be selected as a preferred plan option.*)
- Question regarding if the recommended signage has been reduced on Valparaiso Avenue. (*Proposed signage regarding bike lane usage by vehicles has been reduced to limit sign clutter.*)
- Comment that summary of public meeting should include attendance information. (*Attendance information for each public meeting has been incorporated into this report.*)
- Comment that the proposed features in the report should also summarize how many of each feature are proposed as well as other detailed information such as approximate costs, size, if a standard or non-standard application, etc. (*This additional information has been incorporated into this report.*)

8. **Atherton Transportation Committee Meeting** (September 11, 2012) – The Atherton Transportation Committee included Town of Atherton and City of Menlo Park staff receiving comments on the Draft Final SR2S Plan (dated 08/27/2012), as well as other general comments concerning the plan. Specific comments made by the Committee members are summarized below with responses in parenthesis:
- Heard of people walking in the swale in the bike lane? Where is this swale? What is the width of the swale? *(The question was specific to the area of the north side of Valparaiso Avenue between Hoover Street and El Camino Real. The width of this area is approximately 9 feet, and a new walking path was installed between Hoover Street and Victoria Drive as part of the Hoover Street lighted crosswalk project, leaving 5 feet of unpaved area.)*
 - New signs should not be obscured especially since there is lots of “junk” on the street. How do we make sure that they are visible to drivers? *(Proper placement of signs was discussed at the meeting, including sight distance and lateral placement from the roadway.)*
 - Green Bike Lane – does it hold off well? How much does it cost? *(Paint mixes with sand was discussed at the meeting to limit slipping on the paint in the rainy months. Maintenance was discussed as relatively minimal and the red texture crosswalks in Menlo Park were discussed as an example of local application of textured paint. Cost estimates were provided and are included as part of this document.)*
 - Safety issue with red light cameras at the intersection of El Camino Real with Valparaiso/Glenwood –camera flashes could be blinding to kids that are walking or biking in the intersection. *(City staff will review and provide response to this comment independent of this project.)*
 - Times for speed feedback display signs to be on? *(There was a consensus from commission that it should be “on” all the time. There is a speeding problem on Valparaiso and the speed feedback display signs will help. A comment was made that sometimes people forget how fast they are driving. Some of the commissioners expressed that the sign, if solar powered, might not be capable of being “on” all the time. There are some solar powered feedback display signs in Atherton that are “off” most of the time. A comment was made that if it is hard wired, it should be “on” all the time.)*
 - Comment was made that in-pavement lighted crosswalks are really effective and that Committee Members were happy with the lighted crosswalk at Hoover Street.
 - Concern that since the new left turn lanes will be too short to accommodate the left turning cars, cars driving in the bike lane to go around the left turning cars will not be eliminated. Can Valparaiso at Hoover Avenue be also considered for a new left turn lane installation? *(There is potential for vehicles utilizing the bike lane to bypass left turn traffic in a new left turn lane that has exceeded its capacity. The green bike lanes and signage could remain part of the plan to continue to provide visual separation for motorists. The roadway width of Valparaiso Avenue at the Hoover Street intersection is 44 feet, therefore a narrow left turn bay could be incorporated at this location for a distance to accommodate two vehicles.)*
 - Where are we going to get funding to implement this plan? *(Discussion was included at the meeting of both the State-funded SR2S program as well as the Federal-funded SRTS program, and other potential regional Bay Area funding*

- programs.)*
- Cost estimate for the new traffic signal on Valparaiso at Elena is too low. How can we get funding for the traffic signal installation if it is not going to be part of the SRTS grant application? Are we going to chop this project into small pieces? *(Discussed that all the proposed elements accept the potential traffic signal and potential Valparaiso widening options would be included in one Safe Routes to School grant funding application. Future improvements would likely be funded through other roadway improvement funding sources.)*
 - Has anyone done a traffic flow study to determine the impact of all these proposed improvements on Valparaiso Avenue? *(The approximate crossing duration for each of the proposed lighted crosswalks is 9-12 seconds. Vehicles would have to wait this time while pedestrians crossed, adding to their existing travel time on Valparaiso. Based on the current pedestrian volumes it is anticipated that the lighted crosswalk locations would be utilized approximately 25 to 30 times during the school peaks.)*
 - Comment from Atherton Police Chief: In our review of the reported collision history on Valparaiso, 4 of 5 collisions involving bicyclists attributed bicyclists' faults as the primary cause factors (PCF). And yet, most of the improvements being proposed on Valparaiso Avenue are related to reducing vehicle speeds on Valparaiso Avenue. Education should also be part of your project for it to have a stronger presentation. *(Discussion was included that Education is permitted as part of a City's grant submission and has a potential maximum funding of \$50,000. In addition, more discussion was included noting that the primary goal of Safe Routes to School is the Encouragement of children to walk and bicycle to school through the enhanced safety of their routes to school. While the bicycle collisions reported were not usually the fault of the motorists, vehicular speeding and unsafe driving maneuvers such as driving in the bike lane on Valparaiso have been noted repeatedly throughout the Public Meeting process as a major reason parents feel unsafe allowing their children to walk or bike to school.)*
9. **Bicycle Commission Meeting #2** (October 8, 2012) – The Commission will discuss the Draft Final SR2S Plan and determine its recommendation to City Council.
10. **Transportation Commission Meeting #3** (October 10, 2012) – The Commission will discuss the Draft Final SR2S Plan and determine its recommendation to City Council.
11. **City Council Meeting** (Fall 2012) – The City Council Meeting will focus on the input received from the Public Meetings and Commission Meetings. City Council will be requested to approve the SR2S Plan for Final Plan publication and the conceptual design of Plan elements.

Proposed Safe Routes to School Elements

The public input process above provided a framework for development and refinement of the Draft Final SR2S Plan. The **Valparaiso SR2S Map** illustrates the SR2S Plan on a conceptual basis. A brief discussion is provided below for each of the improvements proposed:

Valparaiso Avenue (East to West):

1. **Install “No Parking Bike Lane” signs:** It was observed routinely during field observations, as well as through comments by residents that vehicles often park temporarily in the bike lanes on Glenwood Avenue between Laurel Street and the Caltrain tracks. The roadway cross-section in this area is relatively narrow and parking vehicles result in cyclists having to leave the bike lane and enter the travel lane. These signs will help to reinforce no parking in the bike lanes.
2. **Add a dashed bike lane stripe eastbound and westbound through El Camino/Valparaiso intersection:** The Glenwood Avenue and Valparaiso approaches to this intersection are slightly offset resulting in a transition slightly north or south while traveling eastbound or westbound through the intersection. This shift results in cyclists potentially riding a different course through the intersection than vehicles, especially younger cyclists. To reinforce a bicycling zone in the intersection, it is recommended that a dashed bike lane stripe follow the inside crosswalk stripe through the intersection. The dashed stripe would be offset 4 feet from the inside crosswalk stripe, but follow the same 2 segment diagonal crossing through the intersection, providing as much spacing between vehicles as the intersection geometrics allow.
3. **Install “Do Not Pass in Bike Lane” signs:** Valparaiso Avenue already includes bike lanes between El Camino Real and Elder Avenue. While the California Vehicle Code permits drivers to use a bike lane for up to 200 feet from an intersection to make a right turn, most motorists observed to drive in the bike lane were using the bike zone as a passing area for overtaking left turning vehicles. This driving maneuver is illegal regardless the distance used to complete the passing maneuver. Field observations found many motorists’ attempt to pass left turning vehicles, especially during congested conditions. To reinforce the law, it is recommended that additional signage be installed along Valparaiso reading “DO NOT PASS IN BIKE LANE.”
4. **Enhanced “green” bike lanes on Valparaiso Avenue:** In addition to the new signage identified above, it is recommended that the bike lane area be reinforced. Recently, a number of cities through the Bay Area have installed “green” bike lanes to reinforce the biking zone. This treatment comprises painting the area between the white bike lane stripes with green paint. Based on feedback from cities that currently have these bike lanes installed, it is recommended that texturized paint be used to provide a better cycling surface during winter rainy months. A recent study in Oregon noted that the result of green bike lanes was that 92% of motorists now yield to bicyclists (72% before), and 87% of drivers now slow down (71% before). It should be noted

that the following local cities have installed green bike lanes: San Francisco (Fell & Market); Santa Clara (Stevens Creek); San Jose (San Fernando St); Pleasanton; Oakland; Berkeley; and, San Mateo.

5. **Install “Speed Limit 25 mph School Zone, When Children Are Present” signs:** Currently there is a School Zone defined on Valparaiso but it is unclear where the boundaries of the school zone are designated. Due to the close proximity of Menlo School and Sacred Heart School campuses, the permitted school zone boundaries overlap and a larger school zone is created. Therefore it is recommended that the current standard “Speed Limit 25 mph School Zone, When Children Are Present” signs be installed prior to the Menlo School campus boundary for westbound vehicular traffic and prior to the Sacred Heart School’s campus boundary for eastbound vehicular traffic. In addition, to the current standard signs it is recommended that flashing beacons also be installed to reinforce the temporary speed limits during drop-off and pickup periods for each of the schools. Enforcement of the school zone speed limit will result in lower travel speeds for a significant portion of the Valparaiso Avenue corridor during the most congested periods, thereby likely resulting in a safer school zone area. *(Field work was conducted to determine a more specific proposed location for each of these signs. The current proposed location being considered is immediately west of the east driveway to the Menlo School parking lot for westbound traffic and at the property line of 1305 Valparaiso Avenue for eastbound traffic.)*
6. **Install Speed Feedback signs:** To reinforce the temporary speed reduction during drop-off and pickup periods, as well as call attention to speeding throughout other periods, it is recommended that electronic speed feedback signs be installed. These signs are recommended for installation for westbound traffic near the Valparaiso Avenue/Crane Street intersection and for eastbound traffic near the Valparaiso Avenue/Roberts Drive intersection. *(Field work was conducted to determine a more specific proposed location for each of these signs. The current proposed location being considered is along the frontage of Menlo School approximately 100 feet west of the east entry driveway to the Menlo School parking lot. The current proposed location is near the southwest corner of the Valparaiso Avenue/Roberts Drive intersection for eastbound traffic.)*
7. **Install Yield sign for cyclists at University Avenue intersection:** Feedback was received from multiple residents and cyclists that the westbound bike lane that curves around a tree at the Valparaiso Avenue/University Avenue intersection creates an additional conflict area with motorists entering the Menlo School campus. The bike lane leaves the roadway edge adjacent to this intersection due to some large trees and the intersection control cabinet on the north side of the intersection. Both cyclists and motorists have noted that it is uncertain who has the right of way at the offset crossing and therefore many near-miss collisions result. To respond to this issue, it is recommended that a YIELD sign and CROSS TRAFFIC DOES NOT STOP placard be installed to warn cyclists of the potential conflict.

8. **Modify Signal Timing:** Many residents and school parents commented on the intersection signal operation at the Valparaiso Avenue/University Avenue intersection. Many motorists entering/exiting the Menlo School campus main entrance or traveling south on University Avenue feel the amount of green time is short. The signal timing will be reviewed to determine if additional green time can be provided to the each of the phases besides the eastbound and westbound through phases. Another potential improvement is to split the phasing between northbound and southbound traffic since currently they share green time during the signal operation.
9. **Install Enhanced Crossings:** The Valparaiso Avenue intersection at Emile Avenue is a location where many vehicle and pedestrian conflicts exist. With no dedicated pedestrian walking area on the north frontage of Valparaiso Avenue, pedestrians typically walking on the south side of the roadway need to cross Valparaiso to access residences north on Emile Avenue as well as the Sacred Heart School campus. Crossing Valparaiso Avenue during congested periods can be difficult, even at intersection locations. Therefore, it is recommended that an enhanced crossing be installed at this location to facilitate safer crossings. The enhanced crossing is recommended to be an in-pavement lighted crosswalk similar to the crosswalk at Hoover Avenue, just east on the Valparaiso Avenue corridor. As an alternative, a new enhanced crosswalk treatment has emerged recently with more vertical driver awareness through small Rectangular Rapid Flashing Beacon (RRFB) signage placed at the crossing location rather than the road-level in-pavement lighting.
10. **Install Traffic Signal:** Both Sacred Heart Schools and Menlo School have completed environmental evaluations for campus modifications in the past couple of years. As part of the review process for each school application, the intersections of Emile Avenue and Elena Avenue with Valparaiso Avenue were reviewed to determine if a new traffic signal at one or both intersections met the signal warrant criteria set by the State of California. Both evaluations found that neither intersection met the warrants required and therefore intersection geometric changes were adopted as mitigation, specifically widening the southbound movements from one lane to two lanes. Both intersections will be evaluated in the future to determine if signal warrants are met. Based on conversations with Sacred Heart School's staff, the preferred signalized location is the Elena Avenue intersection, and therefore that intersection is shown for potential future signalization on the plan and will be considered in the future if warrants are met at the intersection.
11. **Install Enhanced Crossing and Pedestrian Ramp:** For school-aged cyclists using Valparaiso Avenue to access Hillview School, they must make a left turn at Elder Avenue. At this location the westbound left turn bay is relatively short and the roadway makes a slight horizontal shift requiring motor vehicle traffic to shift as well. To improve safety for children riding their bikes to Hillview School as well as pedestrian access, an enhanced crosswalk is also recommended on the west leg of the Valparaiso Avenue/Elder Avenue intersection. Children will have to dismount their bikes to use the crossing but

for less experienced riders, this alternative may feel safer than navigating the left turn in traffic. The enhanced crossing is similar to that recommended in Item 9 above as either an in-pavement lighted crosswalk or a RRFB crossing. To provide a space for crosswalk users on the southwest corner of the crosswalk, a new pedestrian ramp and some vegetation and landscaping clearing is necessary.

12. **Install a Pedestrian Path on South Side of Valparaiso:** Currently there is no dedicated walking area on the north side of Valparaiso except in unmaintained dirt areas that become muddy in the winter months. The south side of the roadway includes some walking areas but they are inconsistent and range from typical concrete sidewalks east of University Avenue to a mixture of asphalt pads, gravel, and dirt west of University Avenue. Therefore, it is proposed that a dedicated walking area be complete on the south side of Valparaiso. The proposed alternative is for either asphalt pads to fill in the missing gap locations, balancing the cost of installation with limited work required to fix tree uprooting, landscaping treatments, and more. A typical concrete sidewalk with new curb and gutter would be cost prohibitive and require the removal of a number of trees, removal of some home owner landscaping, as well as engineering design for new drainage in the area.

Elder Avenue (North to South):

13. **Repair/replace Pedestrian Path on East Side of Elder Avenue:** Most of the east side of Elder Avenue has walking areas for pedestrians separated from the traveled way; however, some areas of this walking space require repair to create a more walkable space. Therefore, specific locations will be repaired/replaced in the pedestrian area on the east side of Elder Avenue.
14. **Parking/Walking Area Informational Signs:** Field observations noted that vehicles park inconsistently on the parking pads on the east side of Elder Avenue. Some vehicles park farther east on the pad, up against the property landscaping while some park closer to the travelled way. This situation creates a pedestrian walking condition that requires students to meander through the vehicles and sometimes walk in the roadway when the space next to the property landscaping is too narrow. Therefore, it is recommended that an informational sign be installed illustrating vehicles park closer to the traveled way, leaving room for a walking path on the east side of the vehicle. This parking/walking configuration will help to provide a consistent and protected path for pedestrians on Elder Avenue.
15. **Refresh Crosswalk Striping:** The Hillview School campus circulation plan will change when the school opens again in the Fall of 2012; however, the current location of the existing crosswalk across Elder Avenue remains the best location for crossing. The crosswalk is currently faded and is proposed to be re-striped.

Santa Cruz Avenue (West to East):

16. **Install “No Parking Bike Lane” signs:** It was observed routinely during field observations that vehicles often park temporarily in the bike lanes on Santa Cruz Avenue near Hillview School. The roadway cross-section in this area is relatively narrow and parking vehicles result in cyclists having to leave the bike lane and enter the travel lane. These signs will help to reinforce no parking in the bike lanes.
17. **Refresh Bike Lane Pavement Markings:** The bike lane markings on Santa Cruz Avenue in the vicinity of Hillview School are fading and are recommended to be refreshed.
18. **Install “Speed Limit 25 mph School Zone, When Children Are Present” signs:** Currently there is a School Zone defined on Santa Cruz Avenue but the signage is partially obscured and is not the current standard signage for school zones. It is recommended that the current standard “Speed Limit 25 mph School Zone, When Children Are Present” signs be installed west of Elder Avenue and Hobart Street to maximize the school zone area permitted by California standard. In addition, to the current standard signs it is recommended that flashing beacons also be installed to reinforce the temporary speed limits during drop-off and pickup periods for each of the schools. Adherence and enforcement of the school zone speed limit will result in lower travel speeds on Santa Cruz Avenue resulting in a safer school zone area. *(Field work was conducted to determine a more specific proposed location for each of these signs. The current proposed location is at the property line of 1787 and 1793 Santa Cruz Avenue for eastbound traffic and at 1100 Hobart Street for westbound traffic.)*
19. **Install Speed Feedback signs:** To reinforce the speed limit throughout the day, it is recommended that electronic speed feedback signs be installed. These signs are recommended for installation for westbound traffic near the Windsor Drive/Santa Cruz Avenue intersection and for eastbound traffic near the May Brown Way/Santa Cruz Avenue intersection. These locations are chosen because they are approximately at the middle of the corridor between Elder Avenue and University Avenue and will help to regulate speeds in this portion of the corridor that does not have any stop sign or other traffic signal traffic control to slow or stop vehicular traffic. *(Field work was conducted to determine a more specific proposed location for each of these signs. The current proposed location is at 1040 Hermosa Way approximately 25 feet east of the Hermosa Way/Santa Cruz intersection for eastbound traffic. The current proposed location is along the frontage of Saint Raymond Elementary School, midblock between Arbor Road and Windsor Drive for westbound traffic.)*
20. **Install Pedestrian Ramps and Sidewalks:** Sidewalks and walking areas existing on both sides of Santa Cruz Avenue, but intermittently along the corridor. The proposed SR2S plan shows repair or installation of multiple sidewalk locations and new pedestrian ramps along Santa Cruz Avenue. The City is currently in the final phase of the Santa Cruz Sidewalk Study and surveying the homeowners regarding their preferred sidewalk rehabilitation

project along Santa Cruz Avenue. Ultimately, the result of the Santa Cruz Sidewalk Study will determine the sidewalk repairs and installation along Santa Cruz Avenue but any plan that provides a contiguous walking area will help to promote Safe Routes.

21. **Install “Share the Road” signs:** The “Share the Road” sign is recommended along Santa Cruz Avenue to increase awareness of motorists that Santa Cruz Avenue also carries cycling traffic and that extra caution should be heeded during on-street parking maneuvers and other turning movements onto or exiting Santa Cruz Avenue.

Laurel Street:

22. **Install “No Stopping Any Time” signs:** It was observed routinely during field observations as well as through comments by residents that vehicles often park temporarily in the bike lanes on Laurel Street during pick-up and drop-off periods. Although this area is currently signed for No Parking, parents are using the area as an alternate drop-off zone. Vehicles idling in this area results in blocking the bike lane and cyclists having to leave the bike lane and enter the travel lane. These signs will help to reinforce no vehicles should be idling in the bike lane.

A tabular summary of the proposed SR2S elements listed above is included as **Table 5**, including the following details:

- Legal applicability of each element or standard engineering practice
- An illustration of each element
- Approximate dimensions of each element
- Typical purpose
- Typical approximate cost

To best understand the cost feasibility of installing each of the SR2S elements discussed above and to assure a competitive grant submittal for project funding, preliminary cost estimates were developed for the proposed SR2S elements. **Table 6** lists the preliminary cost estimate for the proposed elements. At this time, the potential traffic signal at the intersection of Valparaiso Avenue and Elena Avenue does not meet the requirements for installation and therefore that traffic signal is shown as an optional cost.

Based on the conceptual layout of the improvements included on the **Valparaiso SR2S Map**, 35% conceptual design plans will be created to illustrate each of the physical improvements recommended in the Plan subsequent to Menlo Park City Council Approval of the SR2S Plan.

Table 5: Proposed SR2S Elements Summary

SR2S Element	Application in accordance with:		Dimensions (W x H)	Typical purpose:	Typical Cost Range
SIGNS					
NO PARKING BIKE LANE	California MUTCD, Part 9, Section 9B.10 (R7-9)		(12" x 18")	To restrict parking along roadway segments experiencing parking, standing, or stopping in a bicycle lane.	\$300 - \$500
DO NOT PASS IN BIKE LANE	California MUTCD, Part 2, Section 2B.36 (R4-18 Modified)		(24" x 30")	To inform road users that using the bicycle lane to pass other vehicles is prohibited.	\$300 - \$500
SCHOOL SPEED LIMIT 25 WHEN CHILDREN ARE PRESENT + FLASHING BEACON	California MUTCD, Part 7, Section 7B.15 (School Speed Limit Assembly C (CA): SR4-1(CA) + FLASHING YELLOW BEACON)		(36" x 72") + Beacon	To indicate the speed limit where a reduced school speed limit zone has been established based upon an engineering study or where a reduced schools speed limit is specified for such areas by statute.	\$7,500 - \$10,000
VEHICLE SPEED LIMIT FEEDBACK	California MUTCD, Part 2, Section 2B.13 (Vehicle Speed Feedback Sign)		(30" x 30")	To display to approaching drivers the speed at which they are traveling. Enhances driver awareness of their speed, especially when used in conjunction with speed limit sign (R2-1)	\$12,500 - \$17,500
YIELD + CROSS TRAFFIC DOES NOT STOP	California MUTCD, Part 2, Sections 2B.08 and 2C.59 (R1-2 + W4-4P)		(36" x 36" x 36") + (12" x 12")	To improve driver (or bicyclist) awareness of conditions that could be misinterpreted.	\$300 - \$500
BICYCLE + SHARE THE ROAD	California MUTCD, Part 2, Sections 2C.49 and 2C.60 (W11-1 + W16-1P)		(30" x 30") + (18" x 24")	To warn drivers to watch for other slower forms of transportation, such as bicycles.	\$300 - \$500
PARK AGAINST GUTTER, WALKING AREA	~ Custom ~		(18" x 18")	To illustrate to drivers that they are to park closer to the traveled way, leaving room for a walking path on the right side of the vehicle.	\$500 - \$750
NOT STOPPING ANY TIME	California MUTCD, Part 2, Section 2B.46 (R26(S) (CA))		(12" x 18")	To inform motorists of a no stopping zone at a specific location where red curb marking is not used.	\$300 - \$500
CROSSWALKS					
ENHANCED PEDESTRIAN CROSSING	Rectangular Rapid Flashing Beacons (RRFB): Federal Highway Administration approval per California MUTCD, Section 1A.10, Approval No. IA-11-83-RRFB-California Statewide		Beacon (4" x 29") + Warning Signs	For use at uncontrolled pedestrian and school crosswalk locations.	\$50,000
	In-Roadway Lights: California MUTCD, Part 4, Chapter 4N		~ 10" Deep x ~ 7.5" Diameter	To warn road users that they are approaching a condition on or adjacent to the roadway that might not be readily apparent and might require the road users to slow down and/or come to a stop.	\$50,000
BICYCLE LANES					
ENHANCED "GREEN" BIKE LANE	California MUTCD, Part 3, Chapter 3G, and Federal Highway Administration Interim Approval for Optional Use of Green Colored Pavement for Bike Lanes (IA-14)		N/A	To enhance the conspicuity of a marked bicycle lane and extensions of bicycle lanes through intersections and traffic conflict areas.	n/a

Table 6: Preliminary Cost Estimate

Corridor / Improvement	Unit	Unit \$	Quantity	Total
Valparaiso Avenue				
Install "No Parking Bike Lane" Sign	Each	\$350.00	2	\$700
Add Dashed Bike Lane Stripe (Through Intersection)	LFT	\$1.50	200	\$300
Install "Do Not Pass in Bike Lane" Sign	Each	\$350.00	12	\$4,200
Install Enhanced "Green" Bike Lane	SF	\$36.00	5,200	\$187,200
Install "Speed Limit 25 mph School Zone, When Children Are Present" Sign (with Beacon)	Each	\$8,000.00	2	\$16,000
Install Speed Feedback Sign	Each	\$15,000.00	2	\$30,000
Install Yield and "Cross Traffic Does Not Stop" Signs	Each	\$350.00	1	\$350
Modify Signal Timings	Each	\$5,000.00	1	\$5,000
Install Enhanced Crossing (In-Pavement/RRFB)	Each	\$50,000.00	2	\$100,000
Install ADA Pedestrian Ramp	Each	\$4,000.00	1	\$4,000
Install Asphalt Pedestrian Path	SF	\$3.50	8,650	\$30,275
Subtotal:				\$378,025
Santa Cruz Avenue				
Install "No Parking Bike Lane" Sign	Each	\$350.00	1	\$350
Refresh Bike Lane Striping	LFT	\$1.50	2,400	\$3,600
Install "Speed Limit 25 mph School Zone, When Children Are Present" Sign (with Beacon)	Each	\$8,000.00	2	\$16,000
Install Speed Feedback Sign	Each	\$15,000.00	2	\$30,000
Install Sidewalk	SF	\$7.00	5,250	\$36,750
Install ADA Pedestrian Ramp	Each	\$4,000.00	2	\$8,000
Install "Share the Road" Sign	Each	\$350.00	4	\$1,400
Subtotal:				\$96,100
Elder Avenue				
Repair/Replace Pedestrian Path	SF	\$3.50	5,100	\$17,850
Install "Parking Against Gutter" Sign	Each	\$350.00	2	\$700
Refresh Crosswalk Striping	LFT	\$5.00	100	\$500
Subtotal:				\$19,050
Laurel Street				
Install "No Stopping Any Time" Sign	Each	\$350.00	1	\$350
Subtotal:				\$350
Total:				\$493,525
OPTIONAL - Corridor / Improvement				
Install New Traffic Signal	Each	\$300,000.00	1	\$300,000

Phase 2 SR2S Alternatives

During the public meetings hosted from the study, many residents inquired about the potential to add left turn lanes on Valparaiso Avenue between University Avenue and Elena Avenue. The addition of left turn lanes along Valparaiso Avenue would remove left turning traffic from the through lanes and alleviate some congestion during peak periods. As noted earlier, motorists often use the bike lanes on Valparaiso Avenue to illegally bypass left turning vehicles waiting to make a turn. The City provided ROW information for this section of Valparaiso Avenue which includes approximately 66 feet in width. To respond to this request, two concepts were developed to determine the feasibility of adding the left turn areas. The two alternatives are included as **Figure 11 and 12** and a description of each alternative is discussed below:

- **Adding left turn lanes between University Avenue and Elena Avenue:** Four new left turn bays were evaluated at the following locations: Eastbound left turn at Emily Avenue; westbound left turn at Arbor Road; eastbound left turn at the main Sacred Heart School entrance; and, eastbound left turn at Elena Avenue. These locations were selected based on the typically higher turning movement volumes at their respective intersections, especially during peak school periods. A westbound left turn lane was also evaluated at San Mateo Drive but was unable to be accommodated since the space required was utilized for the eastbound left turn bay in the Sacred Heart Schools. Each new turn bay location was conceptually designed consistent with current design standards included the required taper distance into each turn bay, making the length necessary to add each turn bay longer than is typically understood by residents.

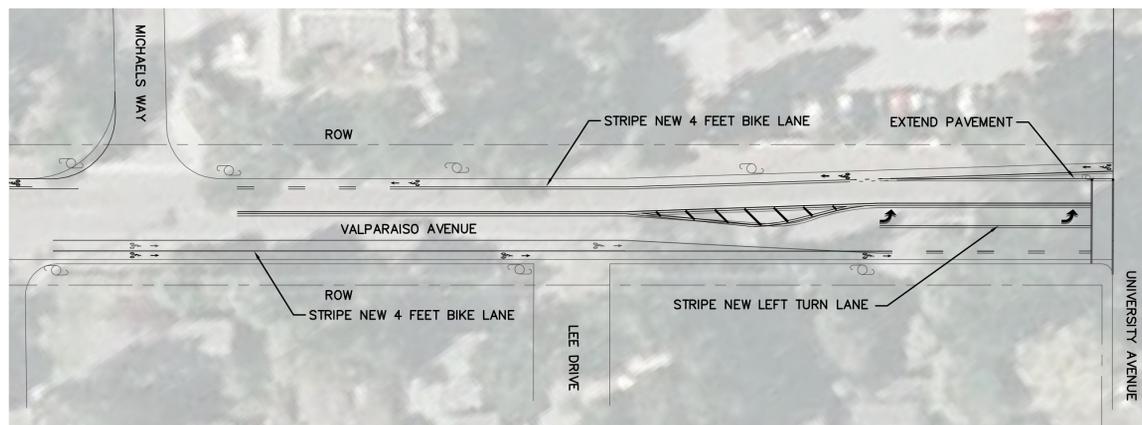

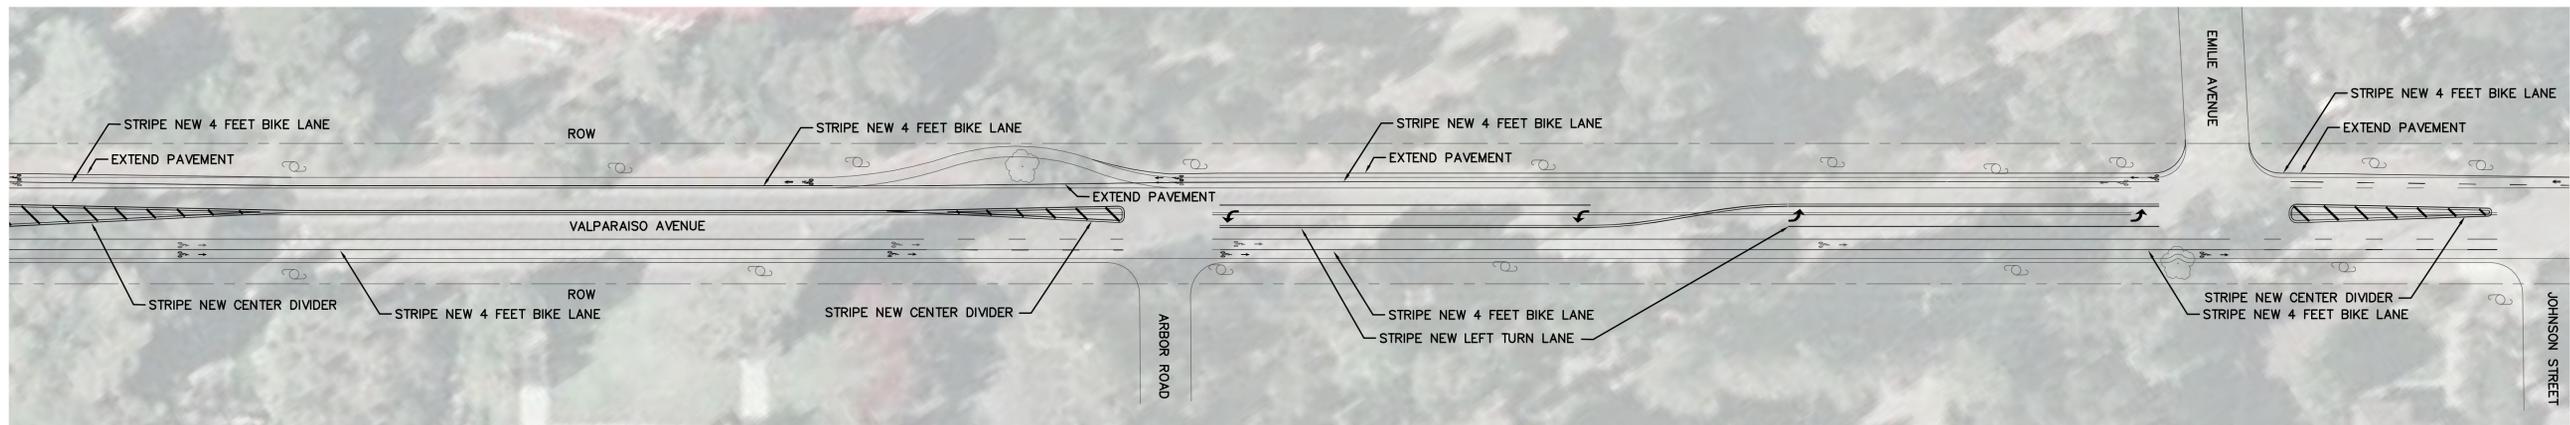

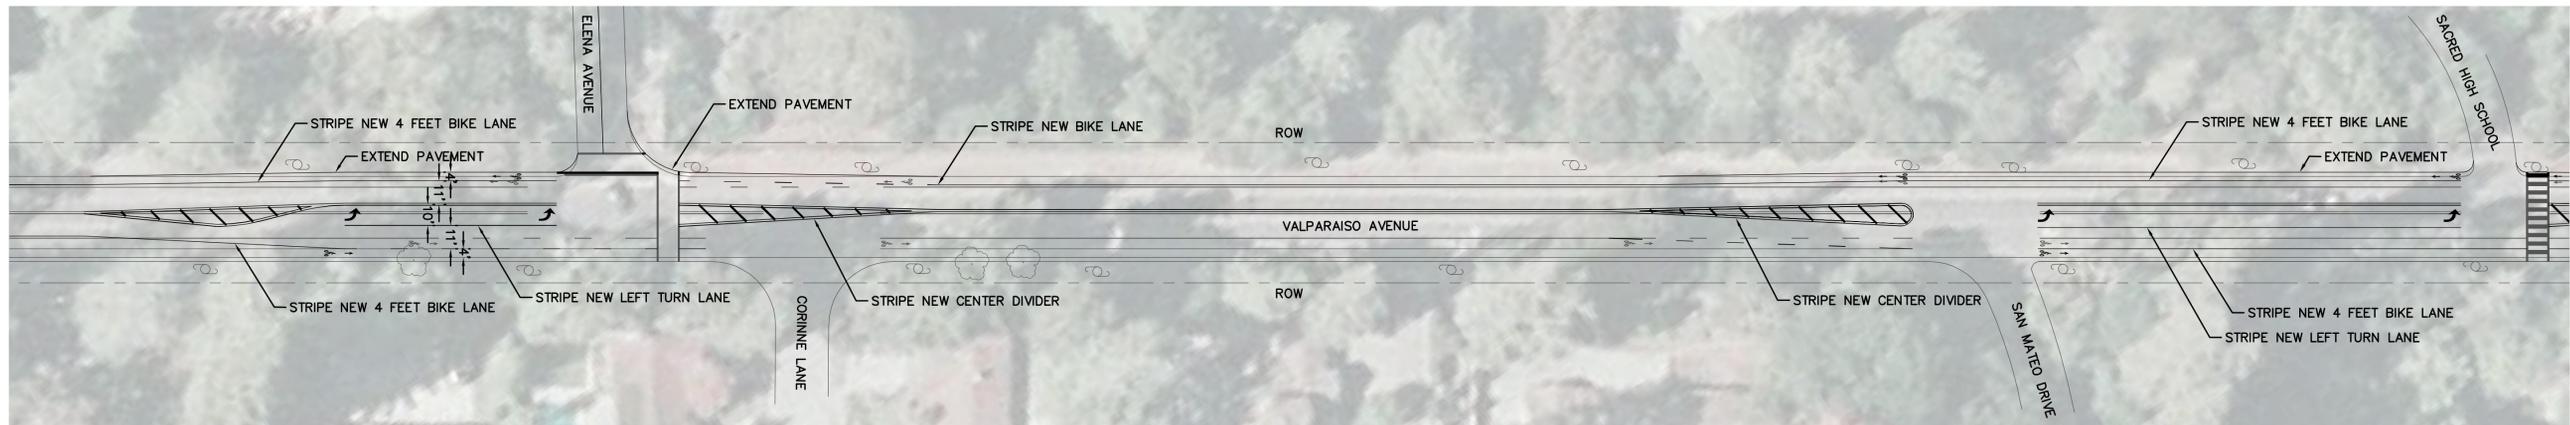

The addition of the turn lanes would require minimal widening of Valparaiso Avenue on the north edge of pavement, however, some residential parking on the south side of the roadway may need to be removed to relocate the bike lane closer to the existing valley gutter. City staff is outreaching homeowners that may be affected by the option to discuss their comments on this conceptual option. In addition to the potential parking removal, the westbound bike lane may need to be rerouted around trees at some locations to prevent removal of such trees and a couple of power poles may also need to be relocated slightly further away from the edge of roadway than their current placement. The estimated approximate cost of this improvement is \$200k to \$300k, depending on actual design of the project alternative.

- **Adding a two-way left-turn lane between University Avenue and Elena Avenue:** An additional option to add a left turning area for vehicles on Valparaiso Avenue was considered to be a two-way left-turn lane (TWLTL). This roadway geometry is similar to what exists on Santa Cruz Avenue within the study area. The advantages of this roadway improvement is that no turn bay taper lengths are required and therefore all of the center lane space may be used for left turn traffic. In addition, this option allows for a left turning storage area for all side street location rather than only the four locations identified in the left-turn only alternative discussed above.

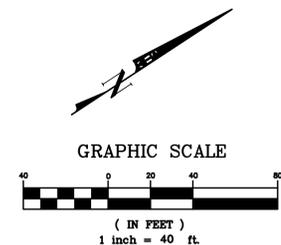

The addition of the TWLTL would require widening of Valparaiso Avenue on the north edge of pavement approximately 8 feet in most locations. This widening would still likely require some residential parking on the south side of the roadway to be removed to relocate the bike lane closer to the existing valley gutter. A slightly more costly alternative would be to retain the current location of the south side residential parking and bike lane and widen the roadway on the north edge by approximately 12 to 14 feet. This option would likely require the removal of one or two trees along the current north frontage of Valparaiso Avenue. A potential major cost item for this alternative is that 20 to 25 power poles would need to be relocated on the north side of Valparaiso Avenue. This relocation cost should be covered through the utility franchise agreement but would create a much more costly project if paid as part of the construction costs. The estimated approximate cost of this improvement is \$700k to \$800k, depending on actual design of the project alternative.

Both of the two alternatives discussed above are considered to be constructed in the moderate to long-term, therefore they are being entitled Phase 2 SR2S Alternatives for the purposes of the project. Existing Safe Routes to School funding grants have a maximum funding allocation of \$500,000 and therefore each of these alternatives would use a majority of the available funding or exceed the available funding. The potential for funding one of these projects is more likely to be originated in local assistance, HSIP, or other roadway improvement funding available from the regional or state agencies.

Appendix D
Neighborhood Meeting #1 – November 10, 2011

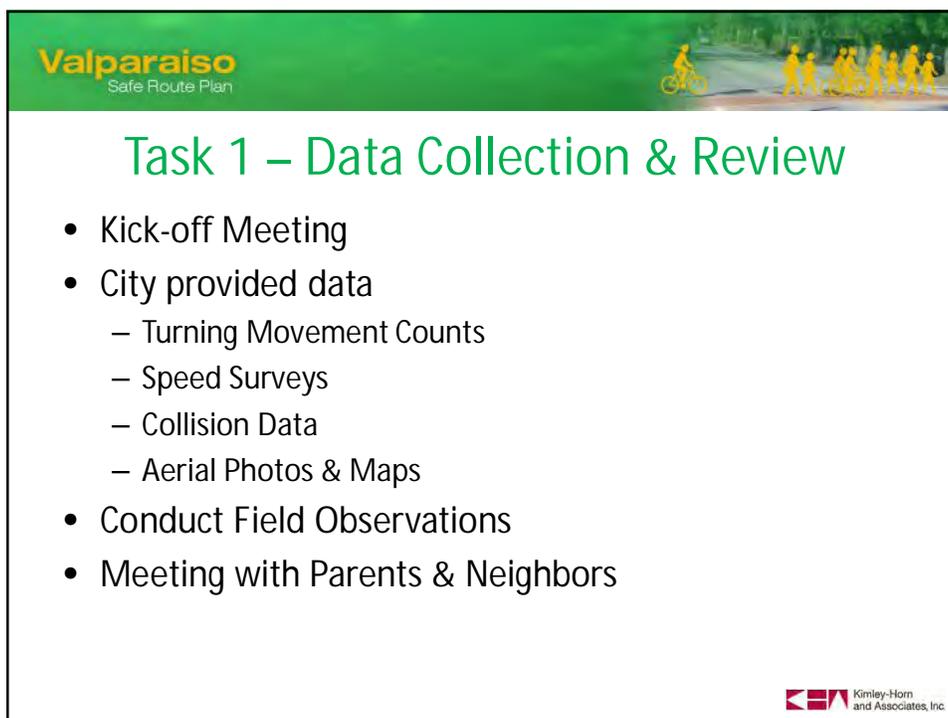

Valparaiso
Safe Route Plan

Public Meeting #1
November 10, 2011

Prepared by:
 Kimley-Horn
and Associates, Inc.

The poster features a green-tinted photograph of a street scene with yellow silhouettes of a cyclist, a group of pedestrians, and a group of people on bicycles. The background shows trees and a clear sky.

Valparaiso
Safe Route Plan

Task 1 – Data Collection & Review

- Kick-off Meeting
- City provided data
 - Turning Movement Counts
 - Speed Surveys
 - Collision Data
 - Aerial Photos & Maps
- Conduct Field Observations
- Meeting with Parents & Neighbors

The slide has a green header with the project name and a small graphic of a cyclist and pedestrians. The main content is a bulleted list of tasks. The footer contains the consultant's logo.

Valparaiso
Safe Route Plan

Task 2 – Improvement Alternatives

- Discuss with City Possible Improvements:
 - Traffic Calming Tools and School Safety Education
- Meet with Steering Committee
 - Discuss advantages/disadvantages
 - Make recommendations
- Neighborhood Meeting
- Prepare Potential Alternatives Improvement Chapter

 Kimley-Horn
and Associates, Inc.

Valparaiso
Safe Route Plan

Task 3 - Draft Plan

- Present Potential Alternatives Improvement to City's Bicycle and Transportation Commissions
- Prepare Draft SR2S Plan
- Present Draft SR2S Plan at Neighborhood Meeting
- Present Draft SR2S Plan to City's Bicycle and Transportation Commissions
- Prepare Final Draft SR2S Plan

 Kimley-Horn
and Associates, Inc.

Valparaiso
Safe Route Plan

Task 4 - Presentation to Menlo Park City Council

- Present Final Draft SR2S Plan
- Discuss Council Members comments
- Prepare Final SR2S Plan

Task 5 – Preliminary Design Plans

- Develop 35% concept plans, special provisions, and cost estimates

 Kimley-Horn and Associates, Inc.

Valparaiso
Safe Route Plan

Data Collection Map

Appendix E
Neighborhood Meeting #2 – March 29, 2012

Valparaiso
Safe Route Plan

Meeting Agenda

- Introductions (Steering Committee) 10 min
- Presentation on Valparaiso SR2S project efforts 20 min
- Discussion and comments of existing issues 20 min
- Proposed Alternatives and Next Steps 10 min
- Small group discussions on proposed alternatives to hear comments and suggestions 60 min

Kimley-Horn and Associates, Inc.

Valparaíso
Safe Route Plan

Safe Routes to School in Menlo Park

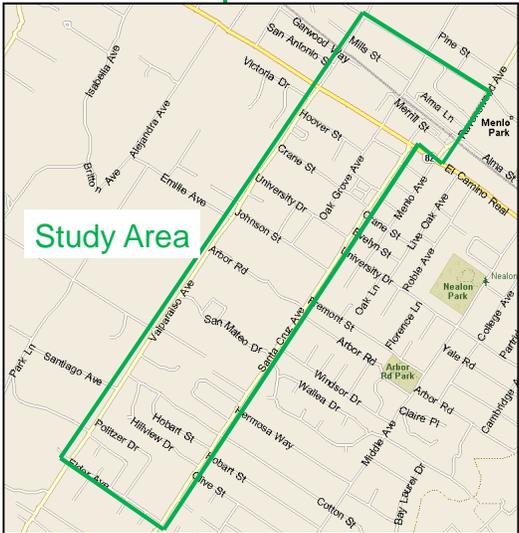

- Safe Routes Projects in Menlo Park
 - Oak Knoll Elementary School (completed & constructed)
 - Laurel Elementary School (completed & constructed)
 - Encinal Elementary School (completed & grant application)
 - Alternative Transportation to Schools Study
 - Valparaíso SR2S Study

 Kimley-Horn and Associates, Inc.

Valparaíso
Safe Route Plan

Valparaíso SR2S Background

Study Area

- Hillview School
- Encinal School
- Oak Knoll School
- Sacred Heart Schools
- Menlo School
- Nativity School
- Saint Raymond School

 Kimley-Horn and Associates, Inc.

Valparaiso
Safe Route Plan

Task 1 – Data Collection & Review

- Kick-off Meeting (Steering Committee)
- City provided data
 - Turning Movement Counts
 - Speed Surveys
 - Collision Data
 - Aerial Photos & Maps
- Conduct Field Observations
- Meeting with City Staff

 Kimley-Horn and Associates, Inc.

Valparaiso
Safe Route Plan

Collision Data

According to studies in the UK, a pedestrian or bicyclist struck by a vehicle traveling at 20 mph has a 15% chance that the collision will be fatal. However, when the speed is 30 mph, the likelihood of a fatality increases to 45% and jumps to 85% at 40 mph.

Speed (MPH)	Chance of Fatality (%)
20 MPH	15%
30 MPH	45%
40 MPH	85%

 Kimley-Horn and Associates, Inc.

Valparaiso
Safe Route Plan

Vehicle Speed Information

Roadway	Posted Speed	Average Speed	85% Speed	10 mph Pace	Speed > 10mph over Limit
Valparaiso Avenue (Cotton St to El Camino Real)	35 mph	34.2 mph	36.7 mph	29-39 mph	0 of 122 vehicles
Valparaiso Avenue (City Limit to Cotton St)	35 mph	36.0 mph	39.1 mph	30-40 mph	2 of 134 vehicles
Santa Cruz Avenue (City Limit to Olive St)	30 mph	30.5 mph	33.6 mph	26-36 mph	1 of 128 vehicles
Santa Cruz Avenue (Olive St to University Ave)	30 mph	32.1 mph	35.6 mph	26-36 mph	1 of 128 vehicles
Santa Cruz Avenue (University Ave to El Camino Real)	25 mph	19.8 mph	23.1 mph	15-25 mph	0 of 120 vehicles

Santa Cruz and Valparaiso Avenue speed surveys to be updated in 2012 and 2013.

Valparaiso
Safe Route Plan

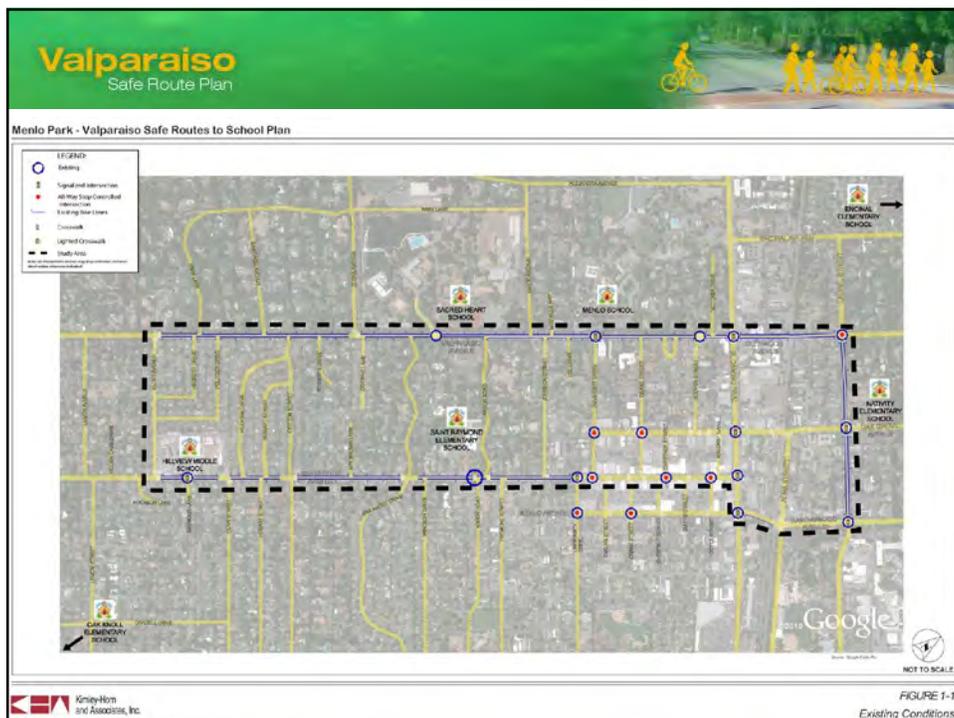

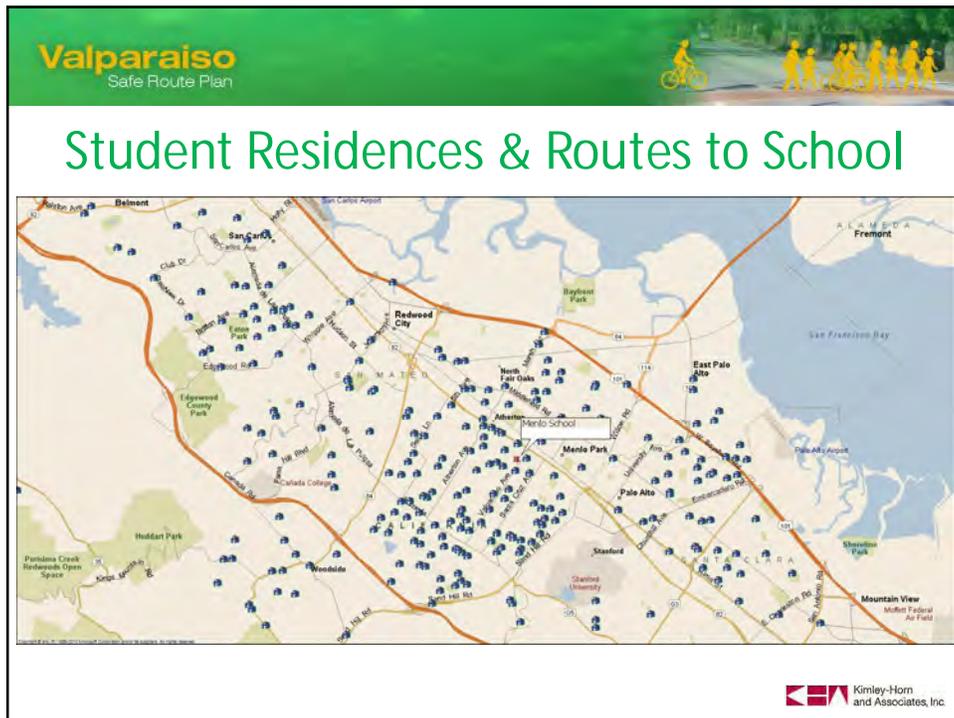

Valparaiso SR2S Collision Data

Pedestrian/bike collision data was provided by Menlo Park and Atherton for the Valparaiso Avenue SR2S study area for 2006 through 2011.

Roadway	Collisions recorded on each roadway each year					
	2006	2007	2008	2009	2010	2011
Elena Avenue	N/A	1	1	N/A	1	N/A
Emilie Avenue	N/A	N/A	1	1	N/A	1
Park Lane	N/A	1	2	N/A	1	N/A
Valparaiso Avenue	N/A	N/A	2	3	4	4
Elder Avenue	N/A	2	1	N/A	1	N/A
San Mateo Drive	4	3	1	N/A	N/A	N/A

Valparaiso
Safe Route Plan

Comments and Observations on Existing Issues

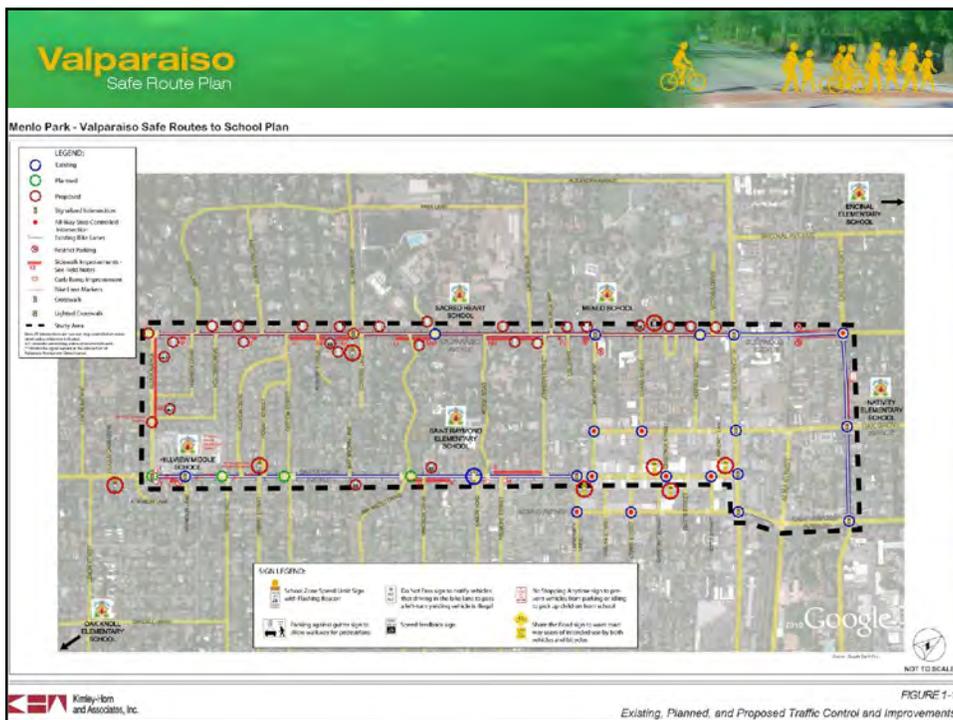

Valparaiso
Safe Route Plan

Task 2 – Improvement Alternatives

- Discuss with City Possible Improvements:
 - Traffic Calming Tools and School Safety Education
- Meet with Steering Committee + Stakeholder Group
 - Discuss advantages/disadvantages
 - Make recommendations
- Neighborhood Meeting (tonight's meeting)
- Prepare Potential Alternatives Improvement Chapter

Task 3 - Draft Plan

- Prepare Draft SR2S Plan
- Present Draft SR2S Plan at Neighborhood Meeting
- Present Draft SR2S Plan to City's Bicycle and Transportation Commissions
- Prepare Final Draft SR2S Plan

Kimley-Horn and Associates, Inc.

Task 4 - Presentation to Menlo Park City Council

- Present Final Draft SR2S Plan
- Discuss Council Members comments
- Prepare Final SR2S Plan

Task 5 – Preliminary Design Plans

- Develop 35% concept plans, special provisions, and cost estimates

Appendix F
Neighborhood Meeting #3
May 30, 2012

Valparaiso
Safe Route Plan

Meeting Agenda

- Introductions (Steering Committee) 10 min
- Valparaiso SR2S background and next steps 10 min
- Valparaiso SR2S plan and March Meeting comments 20 min
- Small group discussions on current plan 60 min

Kimley-Horn and Associates, Inc.

Valparaíso
Safe Route Plan

Safe Routes to School in Menlo Park

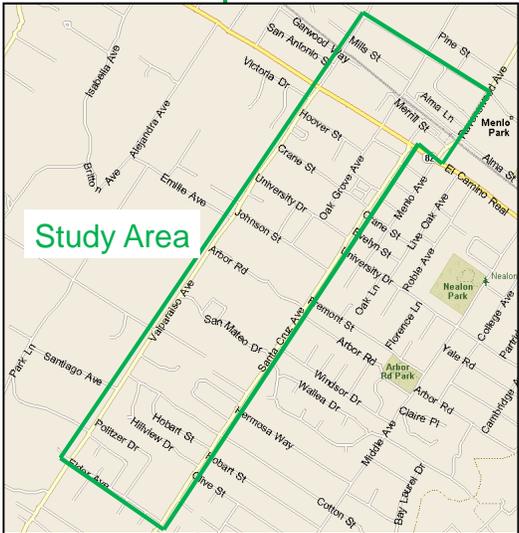

- Safe Routes Projects in Menlo Park
 - Hillview Middle School (completed & constructed)
 - Oak Knoll Elementary School (completed & constructed)
 - Laurel Elementary School (completed & constructed)
 - Encinal Elementary School (completed & grant application)
 - Alternative Transportation to Schools Study
 - Valparaíso SR2S Study

 Kimley-Horn and Associates, Inc.

Valparaíso
Safe Route Plan

Valparaíso SR2S Background

- Hillview School
- Encinal School
- Oak Knoll School
- Sacred Heart Schools
- Menlo School
- Nativity School
- Saint Raymond School

 Kimley-Horn and Associates, Inc.

Valparaiso
Safe Route Plan

Task 1 – Data Collection & Review

- Kick-off Meeting (Steering Committee)
- City provided data
 - Turning Movement Counts
 - Speed Surveys
 - Collision Data
 - Aerial Photos & Maps
- Conduct Field Observations
- Meeting with City Staff

Valparaiso
Safe Route Plan

Task 2 – Improvement Alternatives

- Discuss with City Possible Improvements:
 - Traffic Calming Tools and School Safety Education
- Meet with Steering Committee + Stakeholder Group
 - Discuss advantages/disadvantages
 - Make recommendations
- Neighborhood Meeting (March 29, 2012)

Task 3 - Draft Plan

- Present Draft SR2S Plan at Neighborhood Meeting (*tonight's meeting*)
Presentation will be available online early next week
- Present Draft SR2S Plan to City's Bicycle and Transportation Commissions
- Prepare Final Draft SR2S Plan

Task 4 - Presentation to Menlo Park City Council

- Present Final Draft SR2S Plan
- Discuss Council Members comments
- Prepare Final SR2S Plan

Task 5 – Preliminary Design Plans

- Develop 35% concept plans, special provisions, and cost estimates

Santa Cruz Sidewalk Study

- Survey letter being sent to property owners in June
- Survey will query residents on 4 alternatives:
 - North side sidewalk only
 - South side sidewalk only
 - North and South side sidewalks
 - North and South side sidewalks + parking pullouts and landscaping buffer

Sacred Heart Schools

- Intersection improvements design
 - Elena/Valparaiso and Emile/Valparaiso designs currently discussed with Town of Atherton staff
- Sacred Heart School SR2S Report (San Mateo County Office of Education)
 - Similar recommendations as current Valparaiso SR2S plan
 - Refreshed crosswalk striping and new lighted crosswalks
 - Signal warrant studies at Valparaiso with Emile, Main Entrance, and Elena
 - Additional recommendations
 - Drop-off and pickup area policy and procedural changes
 - Refreshed/new crosswalk striping on Elena Avenue and Isabella Avenue
 - No parking areas adjacent to campus property

Comments Received at March Meeting

- Park Lane: Request was made to review no parking areas and other traffic issues.
 - Atherton Staff asked that the request be formally submitted to the Town Staff or the Transportation Commission.
- University/Valparaiso Signal: Request was made to review signal timing.
 - Request has been incorporated into the Plan, likely lengthen the eastbound left turn and north/south timing.

Comments Received at March Meeting

- Johnson/Santa Cruz: Request was made to relocate stop bar to improve sight distance.
 - Request has been incorporated into the Plan.
- Valparaiso Bike Lane (north side): Request was made to widen bike lane
 - Request has been incorporated into the Plan, bike lane will be widened from typical 4 feet to 5 feet between intersections. At intersections, widening may be cost prohibitive but will be reviewed to determine if striping can be modified easily.

Valparaiso
Safe Route Plan

Comments Received at March Meeting

- Johnson/Valparaiso: Request was made to review flooding along Valparaiso between Arbor and Johnson.
 - Request is being reviewed to determine drainage options. Currently no storm water inlets close to location.
- El Camino Real/Valparaiso: Request was made to review additional bike striping at intersection.
 - Request has been incorporated into the plan with dashed bike lane striping through the intersection, parallel to the crosswalk.
