RESOLUTION NO.

**RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MENLO PARK
AUTHORIZING MODIFICATIONS TO THE DOWNTOWN MENLO PARK
PARKING OPTIONS AND TIME RESTRICTIONS**

The City of Menlo Park, acting by and through its City Council, having considered and been fully advised in the matter and good cause,

WHEREAS, Downtown patrons/business owner expressed the need for longer parking time limit restrictions to accommodate the typical patronage stays; and,

WHEREAS, extended parking time limits could encourage more downtown patronage and create a vibrant downtown.

NOW, THEREFORE, BE IT RESOLVED, the City Council of Menlo Park does hereby approve the implementation of a 6-month pilot program for the on- and off- street parking time restriction changes in Downtown Menlo Park as follows: a) changes all Downtown public off-street Parking Plazas from 2-hour free parking limit to 3-hour limit, b) change all Downtown public on-street parking spaces from 1-hour free parking limit to 90-minute limit.

I, Pamela Aguilar, City Clerk of Menlo Park, do hereby certify that the above and foregoing Council Resolution was duly and regularly passed and adopted at a meeting by said Council on the tenth day of November, 2015, by the following votes:

AYES:

NOES:

ABSENT:

ABSTAIN:

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the Official Seal of said City on this tenth day of November, 2015.

Pamela Aguilar
City Clerk

STAFF REPORT

City Council

Meeting Date: 10/20/2015

Staff Report Number: 15-160-CC

Regular Business:

Consider Changes to the Downtown Menlo Park Parking Options and Time Restrictions

Recommendation

Staff recommends that the City Council consider the following changes to downtown parking options and time restrictions:

- a. Implement free parking time limit changes to all Downtown off-street Parking Plazas from the currently designated 2-hour limit to 3-hour limit.
- b. Implement free parking time limit changes to all Downtown on-street parking spaces from the currently designated 1-hour limit to 2-hour limit.
- c. Direct staff to prepare a report to expand pay parking options to Parking Plazas 2, 3, 4, 6, 7, and 8, after the initial free 3-hour parking limit as shown on Attachment A.

Staff anticipates returning to the Council for approval and an appropriations request on November 10, 2015 to implement these changes, if directed. A draft resolution for these modifications is included in Attachment B.

Policy Issues

Implementation of changes to Downtown parking time restrictions is in line with several policies stated in the 1994 General Plan Circulation Element. These policies seek to strengthen Downtown as a vital and competitive shopping area while encouraging the preservation and enhancement of Downtown's historic atmosphere and character. The El Camino Real/Downtown Specific Plan included recommendations for management strategies and to increase the parking supply, but did not recommend changes to the time restrictions for existing parking areas.

Background

In June 2009, the City Council authorized a detailed Downtown Menlo Park Parking Study (Study). The Study reviewed all previous Downtown parking studies since 1999, made a set of recommendations, and the City implemented the Study recommendations in 2011. The changes were intended to address the short- and long- term parking needs generated by the Downtown businesses and patrons at the time of the Study. The recommendations are listed below:

- Changed most existing Santa Cruz Avenue on-street parking to a 1-hour time limit and converted a number of other spaces to a 15-minute time limit.

- Maintained other downtown adjoining streets' on-street parking time limit to 1-hour.
- Changed downtown periphery streets' on-street parking time limit to 2-hours.
- Changed posted enforcement hours throughout the downtown area to Monday through Friday, 9:00 am to 6:00 pm.
- Converted all parking spaces in Parking Plazas 1 and 5 into pay long-term parking options after the initial free 2-hour time limit as shown on Attachment A.
- Reduced the number of annual employee parking permits at Parking Plaza 2 and reallocated a portion of this parking to less utilized Parking Plazas.

The parking supply in Downtown Menlo Park is divided among three principal types of parking:

- City-owned lots (Parking Plazas)
- Public on-street (curbside) parking facilities
- Private off-street parking facilities

Most of the parking supply is off-street with the largest single component being private lots and garages (approximately 46%), followed by the City Parking Plazas (approximately 31%), with the remaining 23% on-street parking. Most of these parking spaces have timed parking restrictions, varying from 15 minutes to 2 hours.

Since the 2011 implementation, staff has monitored community feedback related to the parking changes. In March 2015, Council held a study session to review the current parking effectiveness, including the key findings summarized below:

- Benefits:
 - Created better parking distribution throughout Downtown
 - Generated high turnover rates on Santa Cruz Avenue
 - Created long-term employee parking supply
- Ongoing Challenges:
 - Perception of aggressive enforcement, particularly in 1-hour parking areas
 - Need for additional long-term employee parking supply
 - Varying parking time limits creates confusion about where to park and for how long

City Council provided direction on the Downtown parking policy at the March 2015 study session to bring back a report on:

- Developing strategies to simplify the patron experience when parking in Downtown
- Modifying time limits in the Plazas from 2-hour to 3-hour free parking
- Modifying time limits for on-street spaces from 1-hour to 2-hour free parking and 15-minute to 30-minute free parking

Each of these strategies is evaluated in the following section. No changes are expected to the Downtown plaza parking daily permit and annual business employee permit.

Analysis

In collaboration with the City Police Department, staff evaluated the potential behavioral and financial effects these strategies could have on Downtown patrons and the City. Each strategy is discussed in detail below:

Simplify Patron Experience when Parking in Downtown

In general, establishing a consistent time limit and pay option could create a more simplified parking experience for Downtown. As such, implementing a pay option for the six remaining Parking Plazas, in addition to the recommended time limit changes, would establish a more consistent Parking Plaza environment as well as provide additional long-term parking options. The implementation of a pay parking option would require new fee collection equipment at the plazas with no pay parking options and could increase the Parking Plaza demand. The preliminary estimated cost to expand the current payment collection system to six additional Parking Plazas is approximately \$210,000. However, with potentially more cost effective new technology available in the market, as a follow up to this report, staff recommends a cost/benefit evaluation of existing versus newer equipment to determine the best option to select for implementation. If approved, the estimated timeline to evaluate equipment and placement layout options would be three to four months. Issues to consider for evaluating new fee collection equipment include: visibility, convenience, ease of operation, cost, and compatibility with the current enforcement system.

Modify Plaza Time Limits

The recommended time limit change from 2-hour to 3-hour free parking to all eight plazas could result in a demand increase in the non-pay Parking Plazas and a shift from the existing pay Parking Plazas (Plazas 1 and 5). The increased demand would likely vary between plazas based on adjacent land uses and could increase existing parking uses to near or at full capacities. The time limit change would also result in revenue losses, with decreased parking tickets purchased for stays longer than 2-hours. In addition, the change may impact the parking enforcement officers' staff time. If these changes are approved by Council and implemented, the Police Department has suggested an evaluation of the required staff time prior to making any staffing modifications. To complete these changes, approximately 60 non-standard signs, would need to be replaced across all eight plazas.

Modify On-Street Parking Time Limits

The recommended time limit change from all existing 1-hour free parking on-street facilities to 2-hour free parking could result in a demand increase in on-street parking and a shift from the Parking Plazas. The increased demand would likely vary based on adjacent land uses and could result in less availability for existing patrons. The time limit change could also result in revenue losses with decreased parking citations and may impact the parking enforcement officers' staff time. If these changes are approved by Council and implemented, the Police Department has suggested an evaluation of the required staff time prior to making any staffing modifications. To complete these changes, approximately 215 signs would need to be replaced along the Downtown streets.

Council also recommended a time limit change for all existing free 15-minute on-street parking to 30-minute parking. The existing 15-minute parking is intended to encourage a high turnover rate and provide convenience for the immediate business patrons (i.e. coffee shops, to-go food pick-up, banks, dry cleaners, etc). While staff recognizes the importance of extending the time limit to accommodate

unexpected delays, the longer time limit could reduce the utility of these short-term spaces. Thus, staff recommends maintaining the existing 15-minute parking zones.

Implementation Recommendations

Postcards were sent out to all Downtown business owners, property owners, and nearby residents within a 300 feet radius of the Downtown area.

Implementation Recommendations

The suggested implementation timeline for replacing the on-street and Plaza signs would be in January 2016, following the 2015 holiday season, when the City typically extends free parking time limits in each plaza to 3-hours for holiday parking. To assess potential unintended consequences, staff recommends implementing the proposed modifications as a 6-month pilot program. Signs would be modified using a low-cost approach, using decals to update the time restrictions during the pilot program. At the 3-month and 6-month milestones during the pilot, staff will collect parking occupancy data in each Parking Plaza, and on each block within the Downtown area during enforcement hours of 9am to 6pm on a typical weekday to assess changes. Additionally, the implications for revenue and enforcement staffing will be reviewed and evaluated as part of the follow-up report. Following the 6-month pilot, staff would bring back a report to the Council in July 2016 to evaluate the program and determine if changes should be implemented permanently.

Impact on City Resources

Revenue for the Downtown Parking Fund comes from two sources: Plaza ticket sales and Plaza permit sales. Staff has estimated potential revenue gain/loss based on available financial data. An itemized summary is provided below:

Annual Revenue Gain/Loss to Downtown Parking Fund Estimate	
Total Parking Plaza Ticket Sales	\$60,000
<i>Anticipated Annual Revenue Loss with 1 Hour Time Limit Extension (Plazas 1& 5)¹</i>	<i>(\$24,000)</i>
Annual Parking Plaza permit sales (671 of 685 at \$592/permit)	\$397,230
Notes:	
1. Based on extrapolation of December 2014 ticket sales, during which the Parking Plaza free parking time limit was extended from 2 hours to 3 hours.	

Revenues from parking violation citations are incorporated into the City’s General Fund. In 2014, the City collected approximately \$795,000 from parking violations (28% of this amount is paid to state/local processing fees), for a net gain of \$572,400. It is anticipated that with extending parking time limits as recommended, the revenue from violations would decrease; the projected decrease cannot readily be determined based on citation records. However, during the pilot program implementation, staff will assess the revenue implications from decreased citations as part of the pilot evaluation.

The cost to implement the time limit changes as recommended above in Recommendations A and B, is estimated to be approximately \$10,300, including staff time for the pilot program installation, as detailed below. If Recommendation C is approved (expand pay options to non-pay Parking Plazas), a cost/benefit evaluation of existing versus new parking fee collection system will be prepared separately.

Staff has estimated replacement of off-street and on-street sign quantities based on existing on-site inventory and plaza size. A summary of the itemized cost for the recommended pilot program, including installation fee, is provided below:

Cost Estimate for Pilot Program			
	Recommendation A: New Plaza Signs for 2-Hr to 3-Hr Parking	Recommendation B: New On-Street Signs for 1-Hr to 2-Hr Parking	Total
Furnish and install (by City) decals	\$1,200	\$4,300	\$5,500
Staff coordination, implementation time	\$2,400	\$2,400	\$4,800
Total Cost	\$3,600	\$6,700	\$10,300

Additionally, staff has estimated the cost for sign replacement if the modifications were to be permanently installed at the conclusion of the pilot program, as provided below:

Cost Estimated for Potential Permanent Installation			
	Recommendation A: New Plaza Signs for 2-Hr to 3-Hr Parking	Recommendation B: New On-Street Signs for 1-Hr to 2-Hr Parking	Total
Furnish (by City) and install (by Contractor) signs	\$17,500	\$31,500	\$49,000
Staff coordination, implementation time	\$9,000 (for non-standard sign design)	\$6,000 (for standard sign design)	\$15,000
Total Cost	\$26,500	\$37,500	\$64,000

An appropriation in the amount of \$10,300 from the Downtown Parking Fund for the pilot program will be requested if approved by the Council.

Environmental Review

The implementation of the timed restriction changes in downtown Menlo Park is categorically exempt under Class 1 of the current California Environmental Quality Act Guidelines. Class 1 allows for minor alterations of existing facilities, including existing highways and streets, sidewalks, gutters, bicycle and pedestrian access, and similar facilities, as long as there is negligible or no expansion of use.

Public Notice

Public Notification was achieved by posting the agenda, with the agenda items being listed, at least 72 hours prior to the meeting.

PROPOSED:

RESOLUTION NO.

ADOPT A RESOLUTION AUTHORIZING CHANGES TO THE DOWNTOWN MENLO PARK PARKING OPTIONS AND TIME RESTRICTIONS AND THE APPROPRIATE FUND FROM THE DOWNTOWN PARKING PERMIT FUND TO IMPLEMENT APPROVED CHANGES

The city of Menlo Park, acting by and through its City Council, having considered and been fully advised in the matter and good cause,

NOW, THEREFORE, BE IT RESOLVED, the City Council of Menlo Park does hereby approve the implementation of a 6-month pilot program for the on- and off- street parking time restriction changes in Downtown Menlo Park as follows: a) changes all Downtown off-street Parking Plazas from 2-hour free parking limit to 3-hour limit, b) change all Downtown on-street parking spaces from 1-hour free parking limit to 2-hour limit; and

BE IT FURTHER RESOLVED, the City Council of Menlo Park does hereby approve the cost/benefit evaluation of existing versus newer equipment for all Parking Plazas and associated expenditure.

I, Pamela Aguilar, City Clerk of Menlo Park, do hereby certify that the above and foregoing Council Resolution was duly and regularly passed and adopted at a meeting by said Council on the tenth day of November, 2015, by the following votes:

AYES:

NOES:

ABSENT:

ABSTAIN:

IN WITNESS WHEREOF, I have hereunto set my hand and affixed the Official Seal of said City on this tenth day of November, 2015.

Pamela Aguilar
City Clerk
